## CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION AND STATEMENTS

This presentation contains "forward-looking information" and future-oriented financial information ("FOFI") within the meaning of applicable Canadian securities legislation. Except for statements of historical fact relating to Allied Gold Corporation ("Allied" or the "Company") information contained herein constitutes forward-looking information, including, but not limited to, any information as to the Company's strategy, objectives, plans or future financial or operating performance. Forward-looking statements are characterized by words such as "plan", "expect", "budget", "target", "project", "intend", "believe", "anticipate", "estimate" and other similar words or negative versions thereof, or statements that certain events or conditions "may", "will", "should", "would" or "could" occur. Forward-looking information included in this presentation includes, without limitation, statements with respect to information concerning the factors supporting the Company's unparalleled optionality and growth; expectations of lower costs for the fourth quarter and continuing downward trend as the Company executes on its growth plans; the Sadiola phased expansion plan and the timing related thereto; expected increase in for 2025 year-over-year; overall expectations for production and costs, exploration, development and operating plans herein being met; plans and timing for completion of new mining studies; the timing and expected outcome of optimization plans; timing and expected outcomes of exploration work; planned mining activities and initial production at Kurmuk; expected capital expenditures at the Company's projects; planned Mineral Resource Statement at Tsenqe in 2025; expected updated Mineral Resources and Mineral Reserves statement at Dish Mountain for Q3 2025. Forward-looking information and FOFI is based on the opinions, assumptions and estimates of management considered reasonable at the date the statements are made, and is inherently subject to a variety of risks and uncertainties and other known and unknown factors that could cause actual events or results to differ materially from those projected in the forward-looking information. These factors include fluctuating price of gold; risks relating to the exploration, development and operation of mineral properties, including but not limited to adverse environmental and climatic conditions, unusual and unexpected geologic conditions and equipment failures; risks relating to operating in emerging markets, particularly Africa, including risk of government expropriation or nationalization of mining operations; risks related to the Company's expansion and optimization plans discussed herein not being met within the timeframe anticipated, or at all; risks related to the successful completion of new mining studies and the declaration of gold production at the Company's development projects; the Company's dependence on products produced from its key mining assets; health, safety and environmental risks and hazards to which the Company's operations are subject; the Company's ability to maintain or increase present level of gold production and maintain or lower costs and expenditures; nature and climatic condition risks; counterparty, credit, liquidity and interest rate risks and access to financing; the Company's success in executing non-dilutive financing alternatives; cost and availability of commodities; increases in costs of production, such as fuel, steel, power, labour and other consumables; risks associated with infectious diseases; uncertainty in the estimation of Mineral Reserves and Mineral Resources; the Company's ability to replace and expand Mineral Resources and Mineral Reserves, as applicable, at its mines; factors that may affect the Company's future production estimates, including but not limited to the quality of ore, production costs, infrastructure and availability of workforce and equipment; risks relating to partial ownerships and/or joint ventures at the Company's operations; reliance on the Company's existing infrastructure and supply chains at the Company's operating mines; risks relating to the acquisition, holding and renewal of title to mining rights and permits, and changes to the mining legislative and regulatory regimes in the Company's operating jurisdictions; limitations on insurance coverage; risks relating to illegal and artisanal mining; risks relating to the development, construction and start-up of new mines, including but not limited to the availability and performance of contractors and suppliers, the receipt of required governmental approvals and permits, and cost overruns; risks relating to acquisitions and divestures; title disputes or claims; risks relating to the termination of mining rights; risks relating to security and human rights; risks related to compliance with anti-corruption laws; risks associated with processing and metallurgical recoveries; risks related to enforcing legal rights in foreign jurisdictions; competition in the precious metals mining industry; risks related to the Company's ability to service its debt obligations; fluctuating currency exchange rates (including the US Dollar, Euro, West African CFA Franc and Ethiopian Birr exchange rates); risks related to the Company's investments and use of derivatives; taxation risks; scrutiny from non-governmental organizations; labour and employment relations; risks related to third-party contractor arrangements; repatriation of funds from foreign subsidiaries; community relations; risks related to relying on local advisors and consultants in foreign jurisdictions; the impact of global financial, economic and political conditions, global liquidity, interest rates, inflation and other factors on the Company's results of operations and market price of common shares; risks associated with financial projections; force majeure events; transactions that may result in dilution to common shares; future sales of common shares by existing shareholders; the Company's dependence on key management personnel and executives; vulnerability of information systems including cyber attacks; as well as those risk factors discussed or referred to in the Company's current Annual Information Form and Management's Discussion and Analysis. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking information, there may be other factors that could cause actions, events or results to not be as anticipated, estimated or intended. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. The Company undertakes no obligation to update forward-looking information except as required by applicable law. The reader is cautioned not to place undue reliance on forward-looking information. The forward-looking information contained herein is presented for the purpose of assisting investors in understanding the Corporation's business, plans and objectives as of the dates presented and may not be appropriate for other purposes.

## CAUTIONARY NOTES TO INVESTORS – MINERAL RESERVE AND MINERAL RESOURCE ESTIMATES

All Mineral Reserve and Mineral Resource estimates of Allied disclosed or referenced herein are presented in accordance with the disclosure standards of National Instrument 43-101 - *Standards of Disclosure for Mineral Projects* of the Canadian Securities Administrators ("NI 43-101") and have been classified in accordance with the 2014 Canadian Institute of Mining, Metallurgy and Petroleum Definition Standards for Mineral Resources and Mineral Reserves. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. See "Appendix A: Mineral Resource and Mineral Reserve Estimates", for a breakdown of Mineral Reserve and Mineral Resource estimates for Allied, which have an effective date of December 31, 2024.

## CAUTIONARY NOTE TO U.S. INVESTORS REGARDING ESTIMATES OF MEASURED, INDICATED AND INFERRED MINERAL RESOURCES

This presentation has been prepared in accordance with the requirements of the securities laws in effect in Canada, which differ in certain material respects from the disclosure requirements promulgated by the U.S. Securities and Exchange Commission (the "SEC"). For example, the terms "mineral reserve", "proven mineral reserve", "probable mineral reserve", "mineral resource", "measured mineral resource", "indicated mineral resource" and "inferred mineral resource" are Canadian mining terms as defined in accordance with Canadian NI 43-101 and CIM Standards. These definitions differ from the definitions in the disclosure requirements promulgated by the SEC. Accordingly, information contained in this press release may not be comparable to similar information made public by U.S. companies reporting pursuant to SEC disclosure requirements.

## CAUTIONARY NOTE TO U.S. INVESTORS REGARDING FINANCIAL STATEMENTS

The financial information of the Company contained herein, that is based on the Company's financial statements, is presented in accordance with IFRS, which differs in certain material respects from U.S. GAAP, and therefore the presentation of financial information may differ from that provided by U.S. companies.

## SCIENTIFIC AND TECHNICAL INFORMATION

Unless otherwise stated, the qualified person for the scientific and technical information contained in this presentation is Sébastien Bernier, P.Geo (Senior Vice President, Technical Services). Mr. Bernier, an employee of Allied and a "Qualified Person" as defined by NI 43-101, has reviewed and approved the scientific and technical information in this presentation, including all Mineral Reserve and Mineral Resource estimates. No limitations were placed on Mr. Bernier's verification process.

## CURRENCY

All dollar amounts in this presentation are stated in U.S. dollars, unless otherwise stated.

## CAUTIONARY STATEMENT REGARDING NON-GAAP MEASURES

The Company has included in this presentation certain non-GAAP financial performance measures and ratios to supplement financial information derived from its consolidated financial statements, which are presented in accordance with IFRS, including the following: (i) Cash costs per gold ounce sold (IFRS: Cost of Sales); and (ii) AISC per gold ounce sold (IFRS: Cost of Sales); and (iii) EBITDA (IFRS: Net Profit). Readers are referred to Appendix B: Non-GAAP Financial Measures. The Company believes that these measures and ratios, together with measures determined in accordance with IFRS, provide investors with an improved ability to evaluate the underlying performance of the Company. Non-GAAP financial performance measures, including cash costs and AISC, do not have any standardized meaning prescribed under IFRS, and therefore may not be comparable to similar measures employed by other companies. Non-GAAP financial performance measures are intended to provide additional information, and should not be considered in isolation as a substitute for measures of performance prepared in accordance with IFRS and are not necessarily indicative of operating costs, operating earnings or cash flows presented under IFRS. Management's determination of the components of non-GAAP financial performance measures and other financial measures are evaluated on a periodic basis, influenced by new items and transactions, a review of investor uses and new regulations as applicable. Any changes to the measures are described and retrospectively applied, as applicable.

## THIRD PARTY INFORMATION

This presentation includes market and industry data which was obtained from various publicly available sources and other sources believed by Allied to be true. Although Allied believe it to be reliable, it has not independently verified any of the data from third party sources referred to in this presentation or analyzed or verified the underlying reports relied upon or referred to by such sources, or ascertained the underlying assumptions relied upon by such sources. Allied does not make any representation as to the accuracy of such information.

# Unique Mid-Tier Gold Producer

Large and Increasing Mineral Inventory and Production Platform

Underpinned by Two Tier-One Generational Mines

Untapped Geological Upside

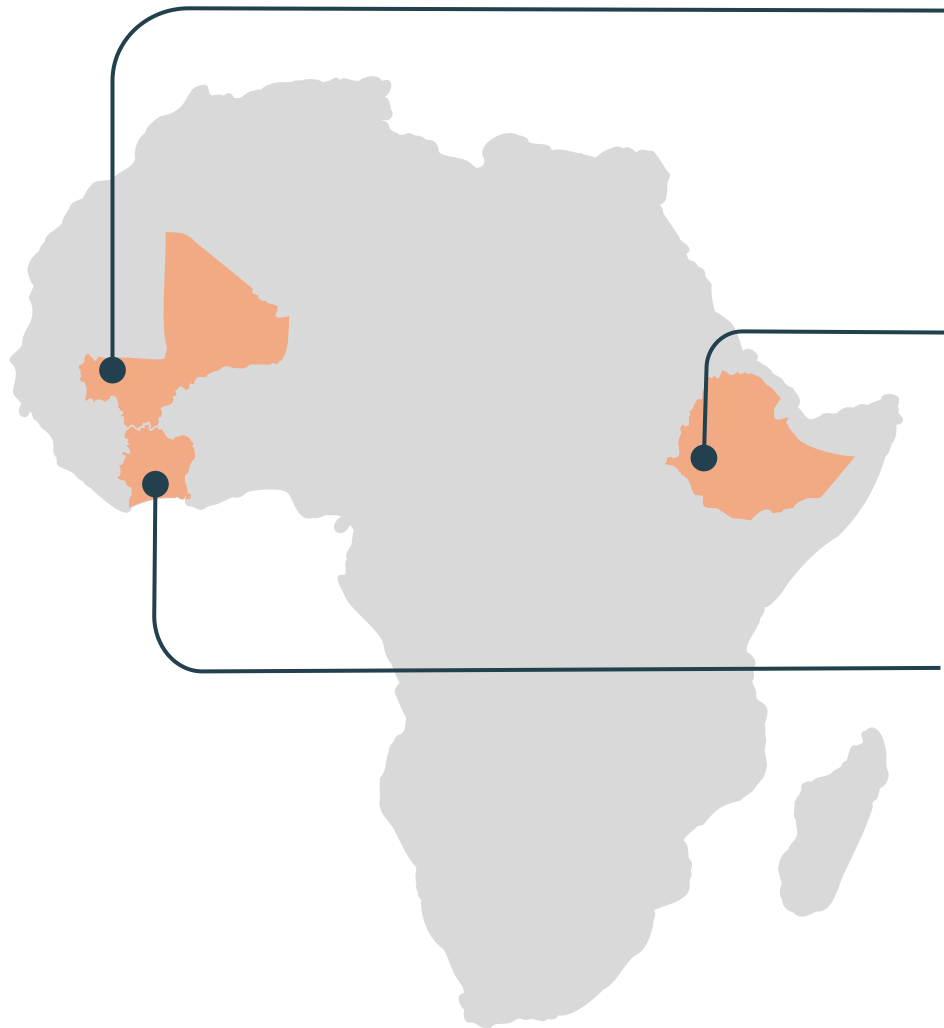

Sadiola

Kurmuk

<b>Short-Term Production</b> <b>200koz-230koz Au</b>	<b>Average Production '30-'33</b> <b>~400koz Au</b>	<b>Target Mine Life</b> <b>20+ years</b>	<b>2026 Production</b> <b>~175koz Au</b>	<b>Average Production '26-'29</b> <b>~290koz Au</b>	<b>Target Mine Life</b> <b>15+ years</b>
<b>LOM Production</b> <b>~300koz Au</b>	<b>+2029 AISC</b> <b>&lt;\$1,200/oz</b>	<b>P&amp;P Reserves:</b> <b>7.2 Moz</b> <b>M&amp;I Resources:</b> <b>10.3 Moz</b>	<b>LOM Production</b> <b>~240koz Au</b>	<b>LOM AISC</b> <b>&lt;\$950/oz</b>	<b>P&amp;P Reserves:</b> <b>2.7 Moz</b> <b>M&amp;I Resources:</b> <b>3.1 Moz</b>

# A Portfolio with Significant Upside Potential

## SADIOLA:

- Large-scale open-pit mine
- Significant and growing mineral inventory
- Costs: Short-term AISC of \$1,650-\$1,735/oz expected to decrease to below \$1,200/oz after completion of expansion project

### Production Plan:

Production of 200koz-400koz gold per year, based on planned two-phased expansion over a long life

## KURMUK:

- Advanced stage development project, expected to begin in mid-2026
- Significant and growing mineral inventory
- Reliable, cost-effective power supply
- Costs: AISC below \$950/oz expected

### Production Plan:

Production of 240koz-290koz gold per year over a long life

## CÔTE D'IVOIRE COMPLEX:

- Stable gold production from open-pit mines
- Costs: Short-term AISC of \$1,775-\$1,873/oz expected to improve due to recent stripping and optimizations
- Exploration underway to extend mine life

### Strategic Production Plan:

Strategic mine life of ten years of production at 180koz gold per year

Notes:

- See Cautionary Note Regarding Forward-Looking Information and Statements.
- All references herein to AISC are to a non-GAAP financial measure and ratio, for which the closest IFRS financial measure is cost of sales. See Disclaimer and Cautionary Statement Regarding Non-GAAP Measures herein, and Appendix B.

# Unparalleled Optionality and Growth

Large existing mineral inventory

New discoveries being identified and proven

Growing production and lowering costs

Allied Gold has a unique presence on two of the world's most abundant gold belts: the Birimian Greenstone Belt and the Arabian-Nubian Shield

# Well Positioned to Deliver on Growth and Realize Upside Optionality

Significant in-country knowledge and presence

Fully permitted mines and development stage projects with established conventions

Geopolitically established jurisdictions for mining

Fiscal stability in each jurisdiction in which we operate

Notes:

- See Disclaimers and Cautionary Statement Regarding Forward-Looking Information and Statements

# 2025 Guidance

<b>Operating</b>	<b>Gold Production</b> <b>375,000 – 400,000</b> <b>ounces</b>	<b>Cash Costs</b> <b>\$1,540-\$1,620/oz</b>	<b>Mine-Site All-in Sustaining Costs</b> <b>\$1,690-\$1,790/oz</b>
<b>Growth</b>	<b>Total Exploration</b> <b>\$20 million</b>	<b>Sustaining Capital</b> <b>\$100 million</b>	<b>Expansionary Capital</b> <b>\$352 million</b>
<b>Corporate</b>	<b>Total DDA</b> <b>\$70 million</b>	<b>Cash Based G&amp;A</b> <b>\$40 million</b>	<b>Cash Income Taxes (at \$2,500/oz)</b> <b>\$55 million</b>

- Expected production - H1:H2 split (%) of 45:55; Q1 similar to comparable periods, while Q4 production is expected to be near 55% higher than Q1's
- Each US\$100/oz increase in gold price results in US\$15/oz higher AISC on a consolidated basis, primarily due to certain royalties based on gold price. Given the Ad-Valorem tax at Sadiola, this gold price impact is proportionally higher

**Notes:**

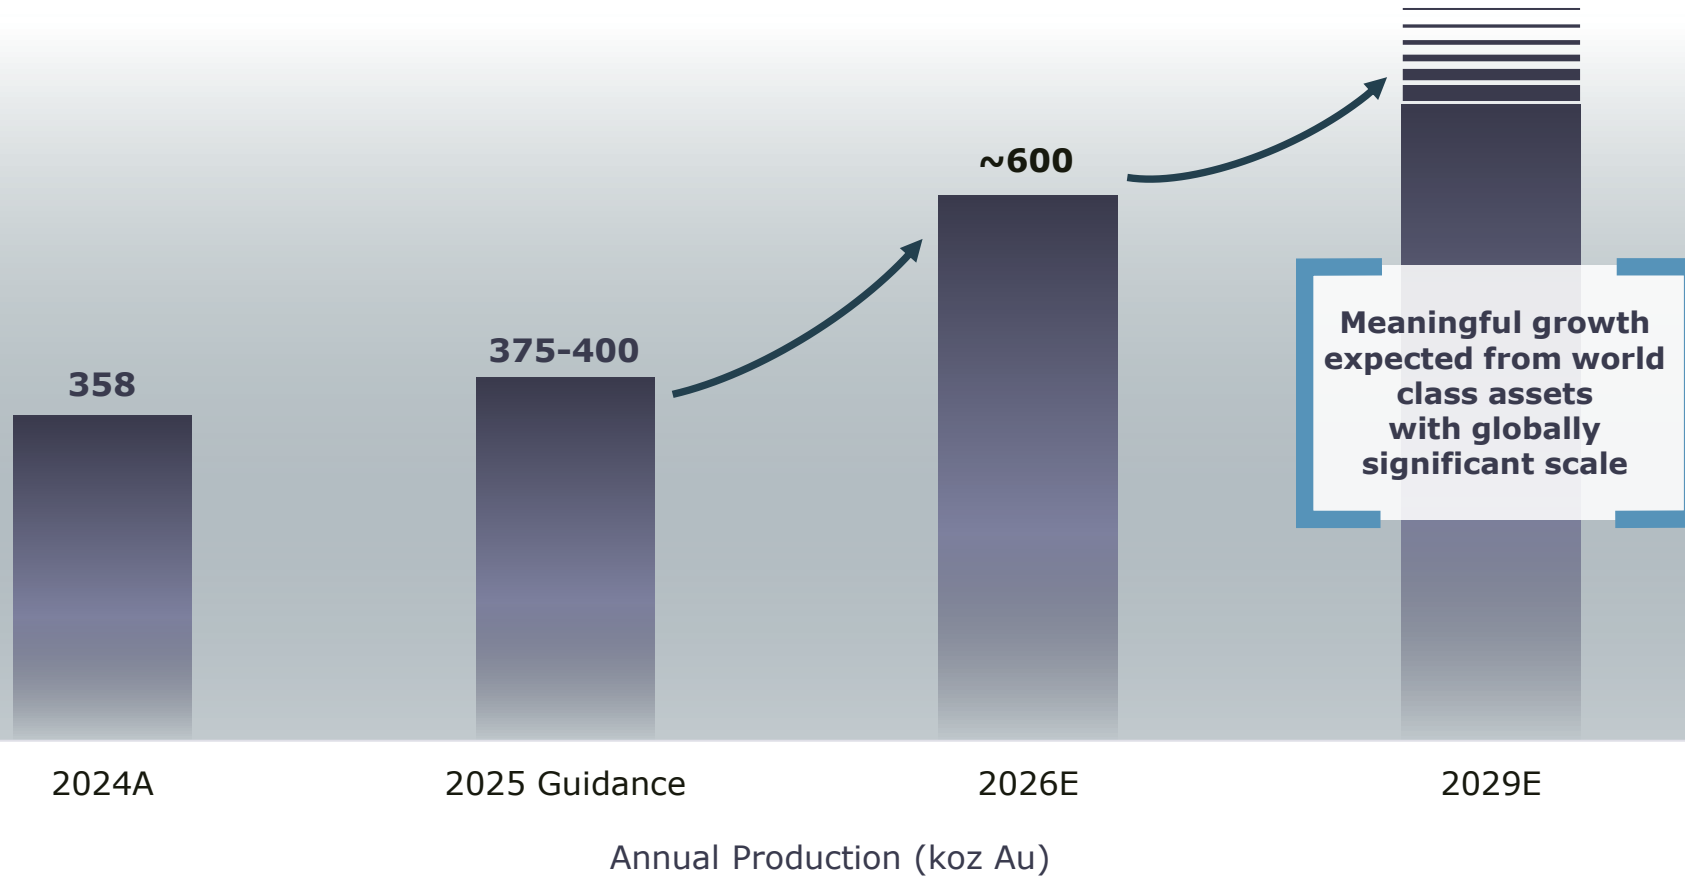

- See Disclaimers and Cautionary Statement Regarding Forward-Looking Information and Statements; Production figures are displayed on a 100% basis.
- References to Cash Costs and AISC are to non-GAAP measures. See Disclaimer and Cautionary Statement Regarding Non-GAAP Measures herein, and Appendix B herein.

2025 is set to deliver increased production year-over-year, while advancing our transformational growth projects across the Company's portfolio

# Significant Near-term Growth with Longer-term Upside

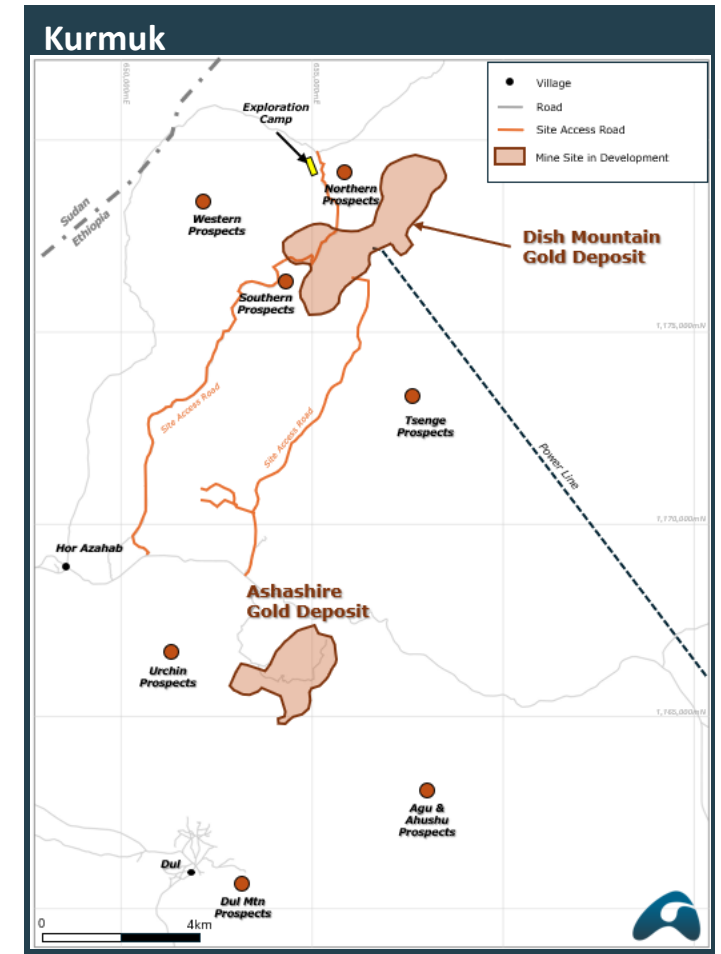

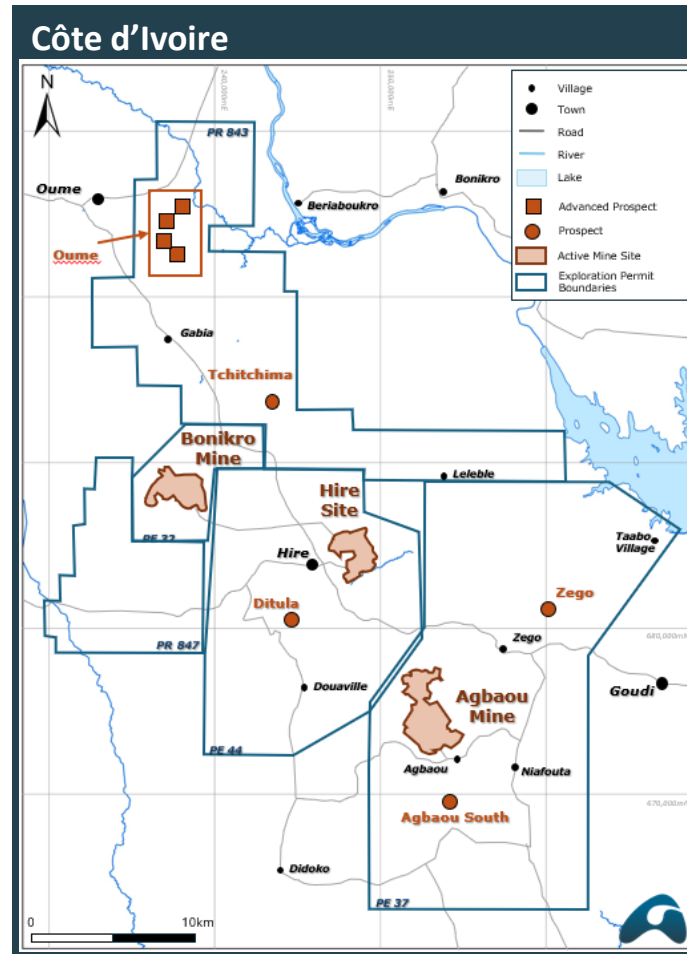

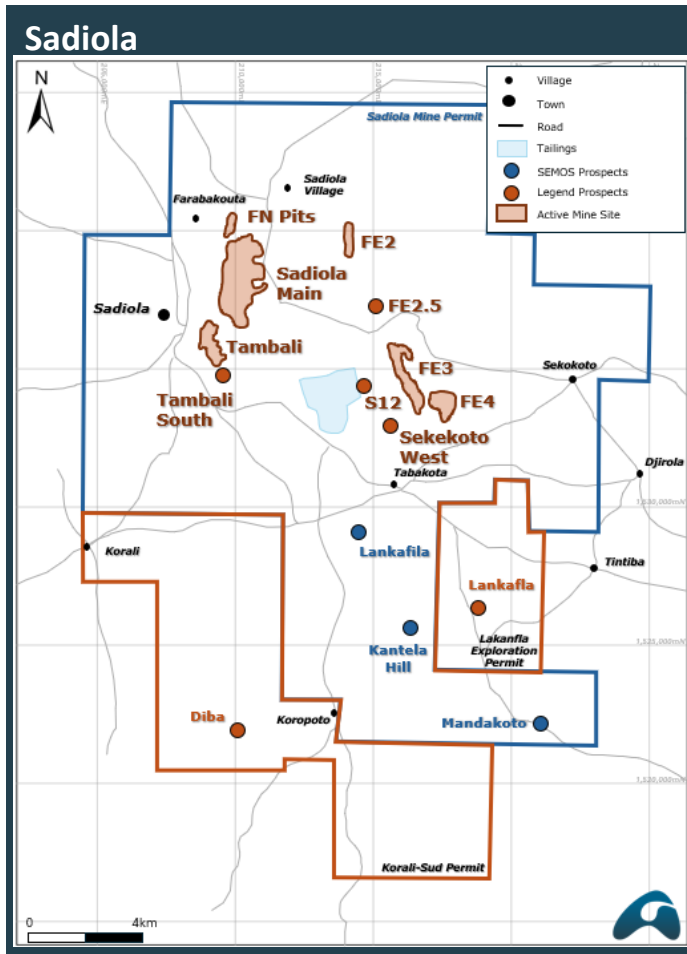

Increasing production and cost improvements are set to deliver robust EBITDA growth, exceeding the rate of production growth

With the plan to **increase production by 50% by 2026** and approximately **double by 2028**, EBITDA is anticipated to **triple by 2026** and increase again to **almost five times by 2029**

# Unparalleled Optionality from Exploration Opportunities

Ongoing exploration activities are part of Allied's strategy to leverage the existing resources and infrastructure to maximize production and cash flows in the short-term

# Unlocking the Potential of an Impressive Resource Base

Allied is Developing an Impressive Portfolio Based on **Optionality and Growth**

We have a large mineral inventory of **16 million ounces**: that number continues to grow because the places where we're operating and exploring, there's "**Gold Everywhere**"

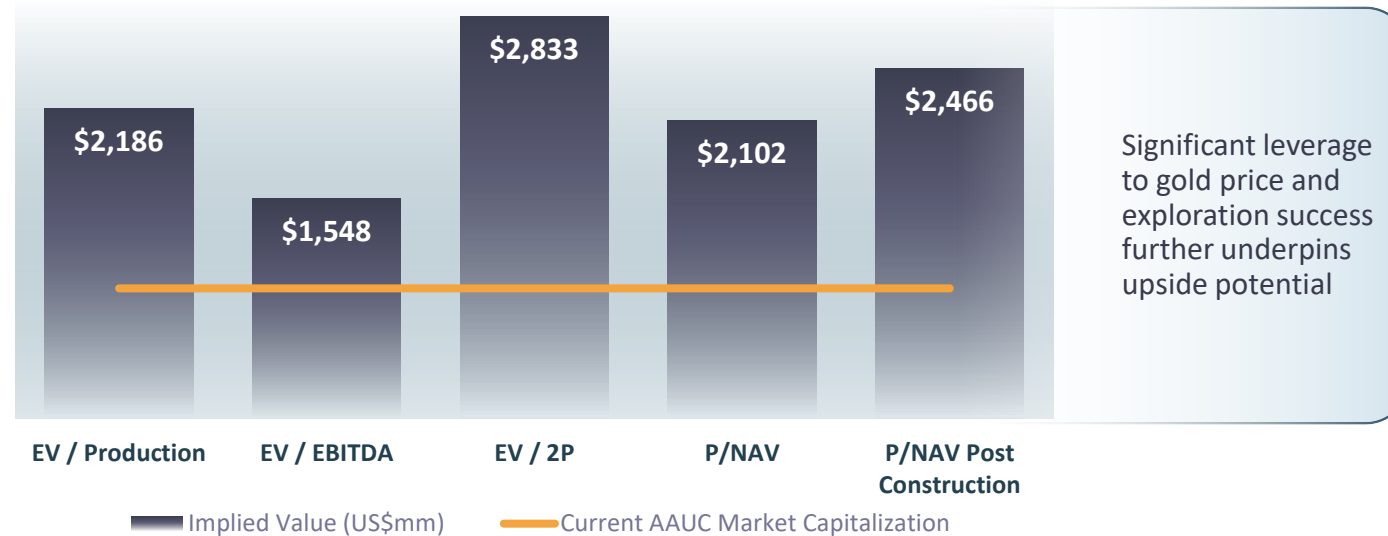

Notes:  
• See Disclaimers and Cautionary Statement Regarding Forward-Looking Information and Statements

# Case Studies in Value Creation<sup>(1)</sup>

## Illustrative Implied Value for Kurmuk (US\$mm)<sup>(2)</sup>

Valuation Metric Read-through from **Centamin** Transaction

## Changes in **Lundin Gold** valuation from the start of the financing to September 2024

Notes:

- See Disclaimers and Cautionary Statement Regarding Forward-Looking Information and Statements
- The implied values are based on the valuation metrics from the Centamin deal applied to Kurmuk:
  - EV/Production: Based on a deal value of \$9,793/oz applied to Kurmuk's LOM average annual attributable production of 223,200 oz (based on extended operating model)
  - EV/EBITDA: Mid-point of 4.0x-5.0x based on the transaction value multiplied by the life of mine attributable EBITDA for Kurmuk, assuming a gold price of \$2,400/oz (approximate market price at the time of the Centamin deal)
  - EV/Proven & Probable Mineral Reserves: Based on the Centamin deal applied to the mineral inventory at Kurmuk (in the extended operating case)
  - P/NAV: Derived from the deal offer price of £1.63/share divided by consensus NAV from FactSet, multiplied by Kurmuk NAV pre- and post-construction under the extended operating case, at a flat \$2,400/oz (to approximate market price at the time of the Centamin transaction)
- Equity Value Change: Based on the percentage change in Lundin Gold's share price on the Toronto Stock Exchange from May 30, 2017, to September 10, 2024
- Change in FactSet consensus P/NAV from May 2017 to September 2024

# Driving Sustainable Growth and Value Creation

Mid-sized Company with Large-Capitalization Profile Underpinned by Two Tier-One Assets [Hiding in Plain Sight](#)

- Growth driven optimizations, expansions and exploration successes
- Anchored by world-class mines
- Focused on the phased expansion at Sadiola, operational improvements and exploration in Côte d'Ivoire, and development and exploration upside at Kurmuk

The optionality across all areas is impressive and will add to future value

- The NAV is significant and will increase
- The EBITDA is significant and will increase
- The share price will catch up to the valuation

Notes:

- See Disclaimers and Cautionary Statement Regarding Forward-Looking Information and Statements

# Allied Gold Africa's Next Leading Gold Producer

## Upcoming Milestones:

- Q1 2025 financial and operating results scheduled for release on May 7
- Annual General Meeting on May 8
- New sustainability report in mid-2025
- Kurmuk exploration and mining plan update in Q3 2025
- An update for Oumé at Bonikro in late 2025, in which Allied will outline plans for a sustainable, longer-life operation at the CDI complex
- Allied is pursuing listing on the NYSE, using the symbol "AAUC"
- Completion of Sadiola expansion Phase 1 in late 2025
- Analyst/Investor Kurmuk site visit in Q4 2025
- Substantial mechanical completion of Kurmuk by the end of 2025, and the start of operations in Q2 2026

Allied is **advancing growth projects and enhancements** across its mining sites to further bolster performance and drive long-term growth

## Year-End 2024 Mineral Reserves and Resources

### Reporting Notes

#### SADIOLA AND KORALI SUD

##### Mineral Resources:

- The Sadiola and Korali Sud Mineral Resource Estimates are listed at 0.5 g/t Au cut-off grade, constrained within an US\$2,000/oz pit shell and depleted to 31 December 2024

##### Mineral Reserves:

- Reflects that portion of the Mineral Resource which can be economically extracted by open pit methods
- Considers the modifying factors and other parameters, including but not limited to the mining, metallurgical, social, environmental, statutory and financial aspects of the project
- Readers are referred to the Sadiola Mine technical report dated June 12, 2023, available on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca)
- Includes an allowance for mining dilution at 8% and ore loss at 3%
- A base gold price of US\$1,700/oz was used for the pit optimization with US\$1,800/oz for Korali Sud
- The cut-off grades used for Mineral Reserves reporting assumes a US\$1,700/oz gold price and vary from 0.31 g/t to 0.78 g/t for different ore types due to differences in recoveries, costs for ore processing and ore haulage

#### KURMUK

##### Mineral Resources:

- The Kurmuk Mineral Resource Estimate is listed at 0.5 g/t Au cut-off grade and constrained within an US\$1,800/oz pit shell

##### Mineral Reserves:

- Reflects that portion of the Mineral Resource which can be economically extracted by open pit methods
- Considers the modifying factors and other parameters, including but not limited to the mining, metallurgical, social, environmental, statutory and financial aspects of the project
- Readers are referred to the Kurmuk Project technical report dated June 9, 2023 available on SEDAR+ at [www.sedarpuls.ca](http://www.sedarpuls.ca))
- Includes an allowance for mining dilution at 18% and ore loss at 2%
- A base gold price of US\$1,500/oz was used for the pit optimization, with the selected pit shells using values of US\$1,320/oz (revenue factor 0.88) for Ashashire and US\$1,440/oz (revenue factor 0.96) for Dish Mountain
- The cut-off grades used for Mineral Reserves reporting assumes a US\$1,500/oz gold price and vary from 0.30 g/t to 0.45 g/t for different ore types due to differences in recoveries, costs for ore processing and ore haulage

# Appendix A

## Year-End 2024 Mineral Reserves and Resources

### Reporting Notes

#### BONIKRO

##### Mineral Resources:

- The Mineral Resource estimate for Bonikro is listed at 0.5 g/t Au cut-off grade, constrained within an US\$2,000/oz pit shell and depleted to December 31, 2024

##### Mineral Reserves:

- Reflects that portion of the Mineral Resource which can be economically extracted by open pit methods
- Considers the modifying factors and other parameters, including but not limited to the mining, metallurgical, social, environmental, statutory and financial aspects of the project
- Readers are referred to the Bonikro technical report dated July 5, 2023 available on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca)
- Includes an allowance for mining dilution at 8% and ore loss at 5%
- A base gold price of \$1,800/oz was used for the Mineral Reserves for the Bonikro pit:
  - With the selected pit shell using a value of \$1,800/oz (revenue factor 1.00)
  - Cut-off grades vary from 0.67 to 0.78 g/t Au for different ore types due to differences in recoveries, costs for ore processing and ore haulage
- A base gold price of \$1,800/oz was used for the Mineral Reserves for the Agbalé pit:
  - With the selected pit shell using a value of US\$1,800/oz (revenue factor 1.00).
  - Cut-off grades vary from 0.67 to 0.78 g/t Au for different ore types to the Agbaou processing plant due to differences in recoveries, costs for ore processing and ore haulage

#### AGBAOU

##### Mineral Resources:

- The Agbaou Mineral Resource Estimate is listed at 0.5 g/t Au cut-off grade, constrained within an US\$2,000/oz pit shell and depleted to December 31, 2024

##### Mineral Reserves:

- Reflects that portion of the Mineral Resource which can be economically extracted by open pit methods
- Considers the modifying factors and other parameters, including but not limited to the mining, metallurgical, social, environmental, statutory and financial aspects of the project
- Readers are referred to the Agbaou Mine technical report dated July 5, 2023 available on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca)
- Includes an allowance for mining dilution of 1m on either side of the mineralized unit and ore loss at 1%
- A base gold price of \$1,800/oz was used for the Mineral Reserves for the:
  - Pit designs (revenue factor 1.00)
  - Cut-off grades which range from 0.41 to 0.63 g/t for different ore types due to differences in recoveries, costs for ore processing and ore haulage

# Appendix B

## Non-GAAP Financial Measures

### NON-GAAP FINANCIAL PERFORMANCE MEASURES

The Company has included certain non-GAAP financial performance measures and ratios to supplement its Consolidated Financial Statements, which are presented in accordance with IFRS, including the following in this presentation: (i) Cash costs per gold ounce sold; (ii) AISC per gold ounce sold; and (iii) EBITDA

The Company believes that these measures and ratios, together with measures determined in accordance with IFRS, provide investors with an improved ability to evaluate the underlying performance of the Company.

Non-GAAP financial performance measures, including cash costs and AISC, do not have any standardized meaning prescribed under IFRS, and therefore may not be comparable to similar measures employed by other companies. Non-GAAP financial performance measures intend to provide additional information, and should not be considered in isolation as a substitute for measures of performance prepared in accordance with IFRS and are not necessarily indicative of operating costs, operating earnings or cash flows presented under IFRS.

Management's determination of the components of non-GAAP financial performance measures and other financial measures are evaluated on a periodic basis, influenced by new items and transactions, a review of investor uses and new regulations as applicable. Any changes to the measures are described and retrospectively applied, as applicable. Subtotals and per unit measures may not calculate based on amounts presented in the following tables due to rounding.

The measures of cash costs and AISC, along with revenue from sales, are considered to be key indicators of a Company's ability to generate operating earnings and cash flows from its mining operations. This data is furnished to provide additional information and is a non-GAAP financial performance measure.

### CASH COSTS PER GOLD OUNCE SOLD

Cash costs include mine site operating costs such as mining, processing, administration, production taxes and royalties which are not based on sales or taxable income calculations. Cash costs exclude DA, exploration costs, accretion and amortization of reclamation and remediation, and capital, development and exploration spend. Cash costs include only items directly related to each mine site, and do not include any cost associated with the general corporate overhead structure.

The Company discloses cash costs because it understands that certain investors use this information to determine the Company's ability to generate earnings and cash flows for use in investing and other activities. The Company believes that conventional measures of performance prepared in accordance with IFRS do not fully illustrate the ability of its operating mines to generate cash flows. The most directly comparable IFRS measure is cost of sales. As aforementioned, this non-GAAP measure does not have any standardized meaning prescribed under IFRS, and therefore may not be comparable to similar measures employed by other companies, should not be considered in isolation as a substitute for measures of performance prepared in accordance with IFRS, and is not necessarily indicative of operating costs, operating earnings or cash flows presented under IFRS.

Cash costs are computed on a weighted average basis, with the aforementioned costs, net of by-product revenue credits from sales of silver, being the numerator in the calculation, divided by gold ounces sold.

# Appendix B

## Non-GAAP Financial Measures

### AISC PER GOLD OUNCE SOLD

AISC figures are calculated generally in accordance with a standard developed by the World Gold Council (“WGC”), a non-regulatory, market development organization for the gold industry. Adoption of the standard is voluntary, and the standard is an attempt to create uniformity and a standard amongst the industry and those that adopt it. Nonetheless, the cost measures presented herein may not be comparable to other similarly titled measures of other companies. The Company is not a member of the WGC at this time.

AISC include cash costs (as defined above), mine sustaining capital expenditures (including stripping), sustaining mine-site exploration and evaluation expensed and capitalized, and accretion and amortization of reclamation and remediation. AISC exclude capital expenditures attributable to projects or mine expansions, exploration and evaluation costs attributable to growth projects, DA, income tax payments, borrowing costs and dividend payments. AISC include only items directly related to each mine site, and do not include any cost associated with the general corporate overhead structure. As a result, Total AISC represent the weighted average of the three operating mines, and not a consolidated total for the Company. Consequently, this measure is not representative of all of the Company’s cash expenditures.

Sustaining capital expenditures are expenditures that do not increase annual gold ounce production at a mine site and excludes all expenditures at the Company’s development projects as well as certain expenditures at the Company’s operating sites that are deemed expansionary in nature, such as the Sadiola Phased Expansion, the construction and development of Kurmuk and the PB5 pushback at Bonikro. Exploration capital expenditures represent exploration spend that has met criteria for capitalization under IFRS.

The Company discloses AISC, as it believes that the measure provides useful information and assists investors in understanding total sustaining expenditures of producing and selling gold from current operations, and evaluating the Company’s operating performance and its ability to generate cash flows. The most directly comparable IFRS measure is cost of sales. As aforementioned, this non-GAAP measure does not have any standardized meaning prescribed under IFRS, and therefore may not be comparable to similar measures employed by other companies, should not be considered in isolation as a substitute for measures of performance prepared in accordance with IFRS, and is not necessarily indicative of operating costs, operating earnings or cash flows presented under IFRS.

AISC are computed on a weighted average basis, with the aforementioned costs, net of by-product revenue credits from sales of silver, being the numerator in the calculation, divided by gold ounces sold.

### EBITDA

EBITDA is a non-GAAP financial measure, for which the closest IFRS financial measure is net profit.
