

GREATLAND 

**A Leading Australian
Gold-Copper Producer**
in Western Australia's Paterson Province

Corporate Presentation
April 2026

Disclaimer

The summary information contained in this document has been provided solely for information purposes and does not purport to be comprehensive or contain all the information that may be required by recipients to evaluate Greatland Resources Limited (**Greatland or Company**). This document and the information contained in it has not been independently verified and no reliance should be placed on it or the opinions contained within it. In furnishing this document, the Company reserves the right to amend or replace this document at any time and undertakes no obligation to provide the recipient with access to any additional information. In all cases, readers should conduct, at their own cost, their own investigation, analysis and evaluation of the Company's business, prospects, operational and financial performance, and condition and should seek their own independent financial, legal or other advice in relation to such matters.

No undertaking, representation, warranty or other assurance, express or implied, is made or given by or on behalf of the Company, its subsidiaries, or any of their respective directors, officers, partners (including joint venture partners), employees, agents or advisers, or any other person, as to the accuracy or completeness of this document or the information contained herein. Accordingly, no responsibility or liability (direct, indirect, consequential or otherwise), whether arising in tort, contract or otherwise, is accepted by any of them for the information or opinions contained in, or for any errors, omissions or misstatements (negligent or otherwise) in, this document or for any loss howsoever arising, directly or indirectly, from any use of such information or opinions.

None of the Company, its subsidiaries, their respective directors, officers, employees, agents, affiliates and advisers, or any other party undertakes or is under any duty to update this document or to correct any inaccuracies in any such information which may become apparent or to provide you with any additional information, in each case, except as required by law or by any appropriate regulatory authority.

This document does not constitute or form part of any offer or invitation or inducement to sell or issue, or any solicitation of any offer to purchase or subscribe for, any securities of the Company nor shall any part of it or the fact of its distribution form part of or be relied upon in connection with any contract or investment decision relating thereto. This document does not constitute a recommendation regarding the securities of the Company. In particular, this document and the information contained herein does not constitute an offer of securities for sale in the United States of America, its territories or possessions.

Neither this document nor any copy of it may be taken or transmitted into the United States of America, its territories or possessions or distributed, directly or indirectly, in the United States of America, its territories or possessions. Neither this document nor any copy of it may be taken or transmitted into Canada, Japan or the Republic of South Africa or to any securities analyst or other person in any of those jurisdictions. Any failure to comply with this restriction may constitute a violation of United States, Canadian, Japanese or South African securities law. The distribution of this document in other jurisdictions may be restricted by law and persons into whose possession this document comes should inform themselves about, and observe, any such restrictions.

This document includes certain "forward-looking statements". All statements other than statements of historical fact included in this document, including without limitation statements regarding the future plans and objectives of the Company, are forward-looking statements that involve various risks and uncertainties. These forward-looking statements include, but are not limited to, statements with respect to pursuing successful production, development and exploration programs, and other information that is based on forecasts of future operational or financial results, estimates of amounts not yet determinable and assumptions of management. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects" or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "estimates" or "intends" or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved) are not statements of historical fact and may be "forward-looking statements". Forward-looking statements are subject to a variety of risks and uncertainties that could cause actual events or results to differ from those reflected in the forward-looking statements. There can be no assurance that forward-looking statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from the Company's expectations include, among others, risks related to the ability to raise additional capital, future commodity prices and changes in commodity prices, foreign exchange fluctuation, general economic conditions, proposed expenditure for exploration, development or production and general and administrative expenses, the actual results of current exploration activities, conclusions of economic evaluations, changes in project parameters as plans continue to be refined, development progress, increased costs and demand for production inputs, the speculative nature of exploration and project development, risks of obtaining necessary licences and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which Greatland operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation. There can be no assurance that such statements will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. Nothing in this document or in the documents referred to in it should be considered as a profit forecast.

Some of the financial performance measures used in this announcement are non-IFRS financial measures, including "all-in sustaining cost", "total cash cost", "net cash", "free cash flow", "operating cash flow", "sustaining capital" and "growth capital". These measures are presented as they are considered to provide useful information to assist investors with their evaluation of the business's underlying performance. Since the non-IFRS performance measures listed herein do not have any standardised definition prescribed by IFRS, they may not be comparable to similar measures presented by other companies. Accordingly, they are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS.

The price of the shares in Greatland (**Shares**) may decline and investors could lose all or part of their investment; the Shares offer no guaranteed income and no capital protection; and an investment in the Shares is compatible only with investors who do not need a guaranteed income or capital protection, who (either alone or in conjunction with an appropriate financial or other adviser) are capable of evaluating the merits and risks of such an investment and who have sufficient resources to be able to bear any losses that may result therefrom. Past performance of the Company or the Shares is not a guide to future performance.

Certain of the industry, market and competitive position data contained in this document comes from the Company's own internal research and estimates based on the knowledge and experience of the Company's management in the market in which the Company operates. While the Company believes that such research and estimates are reasonable and reliable, they, and their underlying methodology and assumptions, have not been verified by any independent source for accuracy or completeness and are subject to change without notice. Accordingly, undue reliance should not be placed on any of the industry, market and competitive position data or forward-looking statements contained in this document.

This document has not been approved by any competent regulatory or supervisory authority.

Important Information

Production Target - Havieron

The information in this presentation that relates to the Feasibility Study for the Havieron Project (**FS**) and its outcomes, and the FS Life of Mine (**LOM**) Production Target (and the forecast financial information derived from the Production Target) are extracted from Greatland's ASX announcement "Havieron Project Feasibility Study" dated 1 December 2025. The Company confirms that all material assumptions and technical parameters underpinning the Production Target or forecast financial information derived from the Production Target (as applicable) in that ASX announcement continue to apply and have not materially changed.

The FS LOM Production Target (and forecast financial information derived from the Production Target) referred to in this presentation is underpinned by Probable Ore Reserves of approximately 80%, Indicated Mineral Resources of approximately 2%, Inferred Mineral Resources of approximately 13%, and an Exploration Target of approximately 5% over the FS LOM period (on a contained metal basis). The Inferred Mineral Resources and Exploration Target included in the FS Mine Plan Production Target are predominantly in the later years of the LOM, with only ~8% Inferred Mineral Resources and 3% Exploration Target (on a cumulative contained metal basis) in the first eight years of production. Refer to Section 7 of the announcement "Havieron Project Feasibility Study" dated 1 December 2025 for further explanation and key assumptions, and the basis for inclusion of the Exploration Target in the FS inventory.

Cautionary statements: There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the Production Target itself (or the forecast financial information derived from it) will be realised. The potential quantity and grade of an Exploration Target is conceptual in nature, there has been insufficient exploration to determine a Mineral Resource and there is no certainty that further exploration work will result in the determination of Mineral Resources or that the Production Target (or the forecast financial information derived from it) itself will be realised.

Competent Persons Statements Mineral Resource & Exploration Target

The information in this presentation pertaining to estimation and reporting of Mineral Resource Estimates and Exploration Targets is based on, and fairly reflects, information and supporting documentation compiled under the supervision of Michael Thomson, Principal Geologist at Greatland. Mr Thomson is a full-time employee of the Greatland Group and has a financial interest in the Company. Mr Thomson is a member of the Australian Institute of Geology (AIG) and has over 23 years relevant industry experience. Mr Thomson has sufficient experience that is relevant to the style of mineralisation and type of deposits under consideration and to the activity currently being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves'. Mr Thomson consents to the inclusion in this report of the matters in the form and context in which it appears. Mr Thomson confirms that he is not aware of any new information or data that materially affects the Mineral Resource or Exploration Target, other than changes due to normal mining depletion during the period from 31 December 2025 to the date of this report.

Ore Reserve Estimate - Telfer

The information in this presentation pertaining to estimation and reporting of the Telfer Ore Reserve Estimate is based on, and fairly reflects, information and supporting documentation compiled by Otto Richter, Group Mining Engineer (and Acting Chief Operating Officer). Mr Richter is a full-time employee of the Greatland Group and has a financial interest in the Company. Mr Richter is a Fellow of the Australasian Institute of Mining and Metallurgy (FAusIMM 301723) and has over 25 years relevant industry experience. Mr Richter has sufficient experience that is relevant to the style of mineralisation and type of deposits under consideration and to the activity currently being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves'. Mr. Richter has reviewed the material assumptions and technical parameters that supported the Telfer Ore Reserve estimate and considers the Ore Reserve Estimate to be valid. Mr Richter consents to the inclusion in this report of the matters in the form and context in which it appears. Mr Richter confirms that he is not aware of any new information or data that materially affects the Ore Reserves, other than changes due to normal mining depletion during the period from 31 December 2024 to the date of this report.

ASX Listing Rule 5.23

This presentation contains references to:

- an Ore Reserve estimate and Exploration Target for Havieron, which have been extracted from the Company's ASX announcement dated 1 December 2025 titled '[Havieron Project – Feasibility Study](#)';
- Exploration Results which have been extracted from the Company's ASX announcement dated 22 January 2026 titled '[December Quarter Resource Development & Exploration Activities Report](#)'.

The Company confirms that it is not aware of any new information or data that materially affects the information included in those announcements, and in the case of the estimate of Ore Reserve for Havieron, that all material assumptions and technical parameters underpinning the estimates in the relevant ASX announcement continue to apply and have not materially changed.

Presentation

This presentation is dated 9 April 2026 and was authorised for release by Shaun Day, Managing Director of Greatland.

This presentation was released by Greatland Resources Limited (ABN 17 688 338 618) of Level 2, 502 Hay Street, Subiaco WA 6008, Australia.

Greatland overview

A new leading Australian gold-copper producer

Owner of the **Telfer mine** & nearby world-class brownfield **Havieron project** in WA

Havieron Feasibility Study completed December 2025, confirming pathway to a **world-class, long-life, lowest quartile cost** Australian gold-copper mine, leveraging existing infrastructure

YTD FY26 Telfer production results:¹

249.9koz gold + **11.0kt** copper

\$2,176/oz H1 FY26 AISC

\$977 million H1 FY26 revenue

\$658 million H1 FY26 OCF

FY26 guidance:²

260 - 310koz gold

\$2,400 - \$2,800 AISC

Production around, or slightly above, the upper end of the range, Lower end of range for AISC

Group Mineral Resource³

14.9Moz³ Au

645kt³ Cu

Reserve update targeted June Q 2026

Strong balance sheet to fund growth and investment at Telfer and Havieron:

\$1,208m cash and nil debt (31 March 2026)¹

Note: All "\$" values mentioned in this presentation are in Australian Dollars, unless specified

(1) Refer to ASX Announcement "December 2025 Quarterly Activities Report" released to ASX on 28 January 2026, "Half Year Report for period ended 31 December 2025" released on 2 February 2026 and "March 2026 Quarter Production Update" released on 7 April 2026.

(2) Refer to ASX Announcement "June 2025 Quarterly Activities Report" released to ASX on 29 July 2025.

(3) As at 31 December 2025. Refer to Slide 40 for further details.

Telfer at a glance

Telfer is an iconic Western Australian gold-copper mine that Greatland acquired in December 2024

Mining

Established **large scale open pit** and **underground** contract mining operations

Processing

20Mtpa combined nominal processing capacity across dual 10Mtpa trains

Production

Produces **gold doré and copper-gold concentrate**
>15Moz cumulative production to date

Growth

240km drilling at Telfer planned in FY26¹ targeting **multi-year life extension**

(1) Refer to ASX Announcement 29 July 2025 "June 2025 Quarterly Activities Report"

Mineral Resource Estimate¹

- **Gold: 8.0Moz Au**
- **Copper: 370kt Cu**

(1) As at 31 December 2025. Refer to Slide 40 for further details

Havieron at a glance

A foundation asset

Long life

Initial FS mine life of **17+ years**, inc. **9 years steady state**¹

3rd largest UG reserve in Australia²

Lowest quartile cost

Steady state avg. AISC of **\$1,610/oz**^{1,3} under Havieron standalone scenario, with potential to reduce if Telfer mine is extended and co-processed with Havieron⁴

Large scale

Life of mine production of **4.0Moz AuEq**^{1,5}

Existing infrastructure

Ore processing through Telfer mill derisks delivery and enables Telfer Hub strategy⁴

Funding

Pre-production capex of \$1,065m expected to be funded from **\$1,208m** cash reserves + **\$500m** debt commitments⁶ + ongoing cash flows

Notes: Refer to announcement 'Havieron Project – Feasibility Study' published 1 December 2025 for additional details.

(1) The Feasibility Study Mine Plan (and the forecast financial information derived from it) is a Production Target that includes approximately 13% Inferred Mineral Resource and 5% Exploration Target over the life of mine (on a contained gold basis). Refer to section on "Production Target" in the announcement "Havieron Project Feasibility Study" dated 1 December 2025, and the cautionary statement on slide 3.

(2) Based on Ore Reserve Estimates (ORE) for Australian underground gold mines / projects.

(3) AISC is stated per ounce of gold produced, net of by-products (copper) credits, assuming a long-term copper price of A\$15,747/t Cu.

(4) Telfer extension opportunities and potential operating cost savings from co-processing under a 'Telfer Hub' scenario. Refer to slide 24 for further details.

(5) Havieron LOM AuEq gold production based on LOM production of 3.53Moz and 130kt Cu on a recovered basis converted to gold equivalent (AuEq) based on assumed prices of A\$4,500/oz Au and A\$15,747/t Cu and metallurgical recoveries based on block metal grade, reporting approximately 86.6% for Au and 84.4% for Cu which equates to a formula of approximately $AuEq = Au (g/t) + 1.06^* Cu (%)$.

(6) Refer slide 26 for details of the debt commitments.

Note: All "\$" values mentioned in this presentation are in Australian Dollars, unless specified

(1) Market data and share ownership data sourced from NASDAQ and S&P Capital IQ as at 8 April 2026.

(2) Excluding \$16.5m in bank guarantees drawn under \$25m contingent instrument facility.

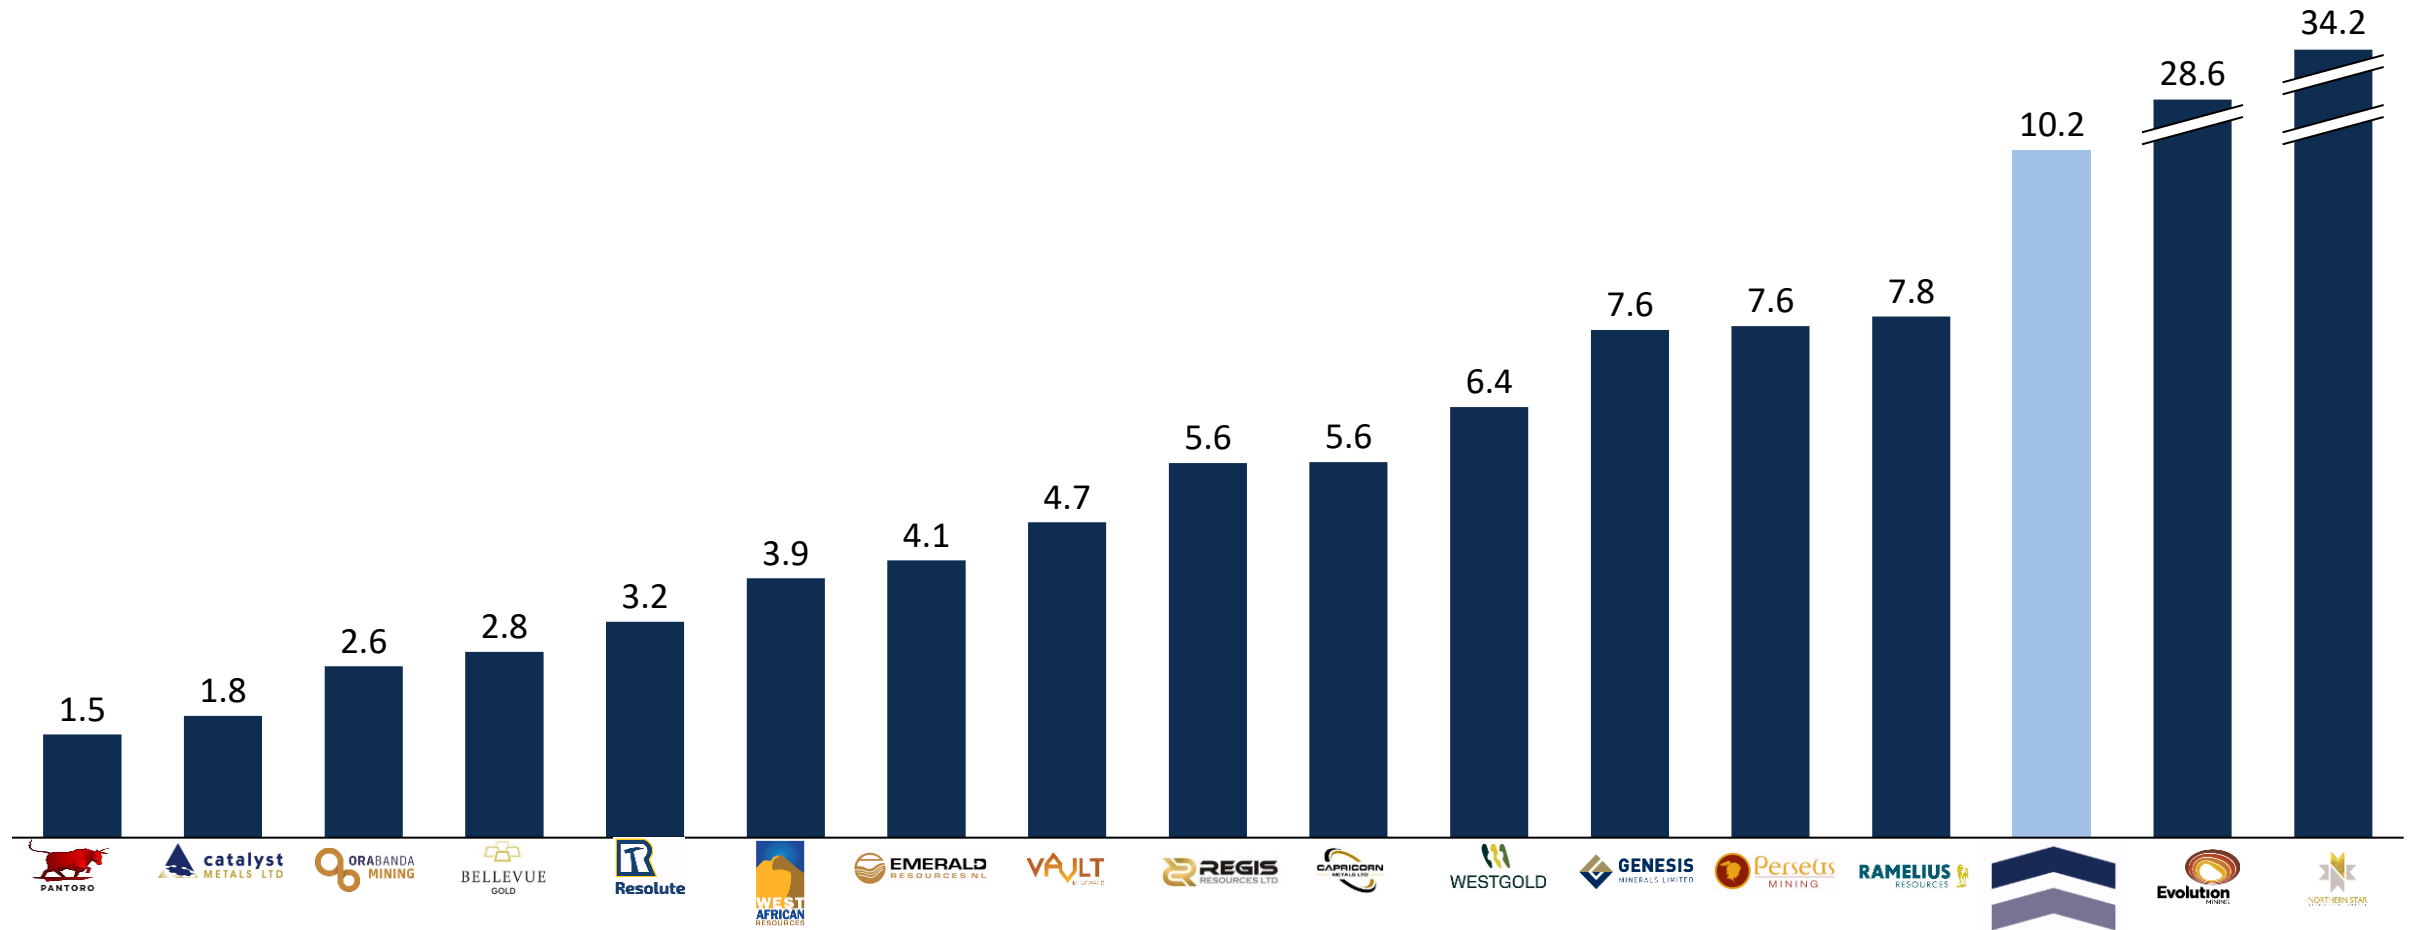

(3) \$100m Syndicated Facility Agreement with ANZ, HSBC and ING, comprising A\$75m working capital facility and \$25m contingent instrument facility. \$75m working capital facility remains undrawn with a maturity date of 30 June 2026.

A leading ASX gold company

Greatland joined the ASX in June 2025, establishing a substantial mid-cap Australian gold producer

ASX listed Australian gold companies by market cap (A\$bn) ¹

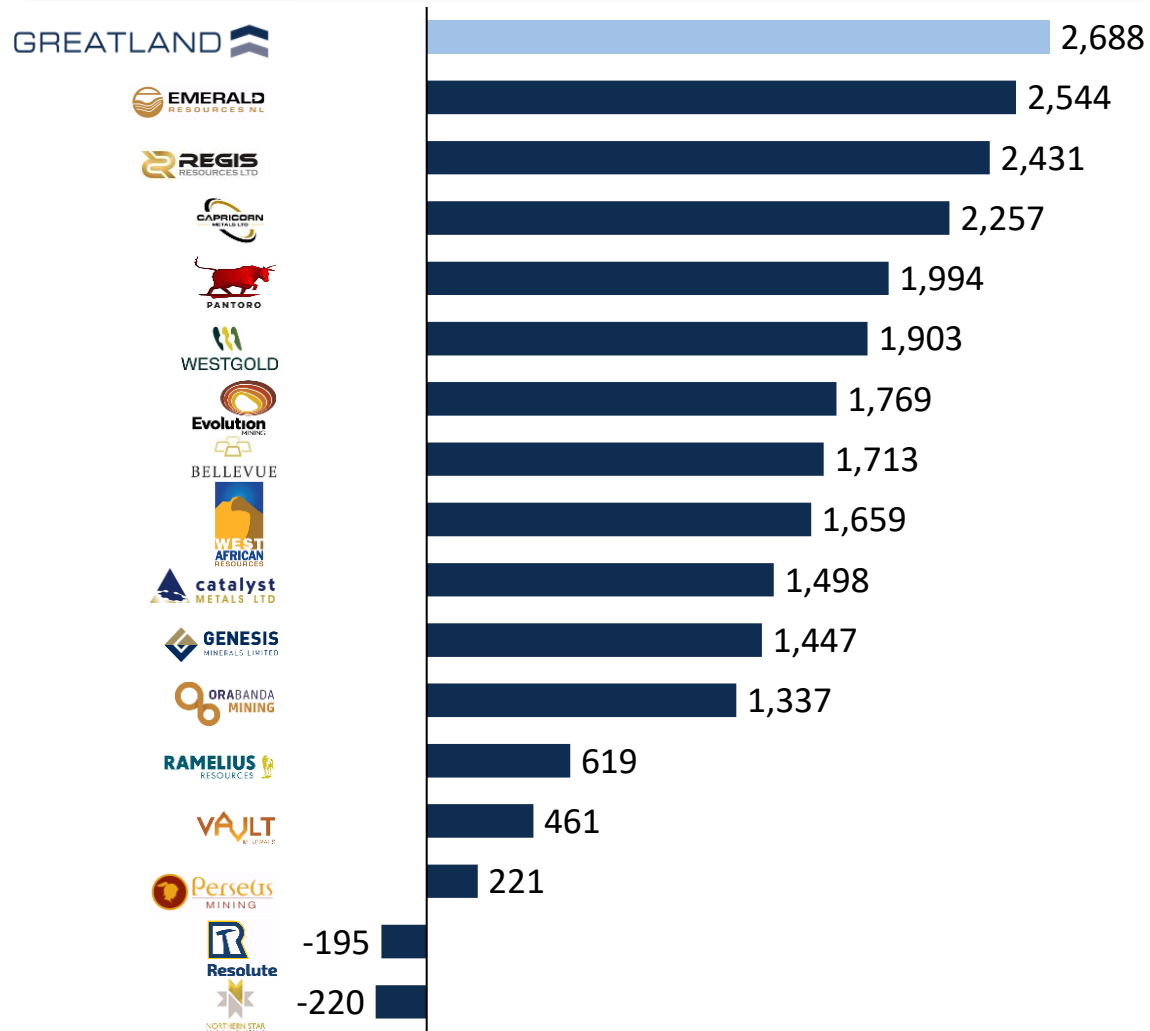

(1) Primary ASX listed gold companies with Australian and overseas operations. Market capitalisation data as at closing price 8 April 2026. Source: S&P Cap IQ.

Strong relative H1 FY26 on key financial metrics

Greatland generated superior free cashflow per ounce in H1 FY26

H1 FY26 Free Cashflow / Gold Produced (A\$/oz)¹

EV / H1 FY26 EBITDA (annualised)¹

(1) Production, 2HCY25 FCF and EBITDA (annualised) data sourced from S&P Visible Alpha, EV data sourced from S&P Cap IQ and dated for 8 April 2026 closing price.

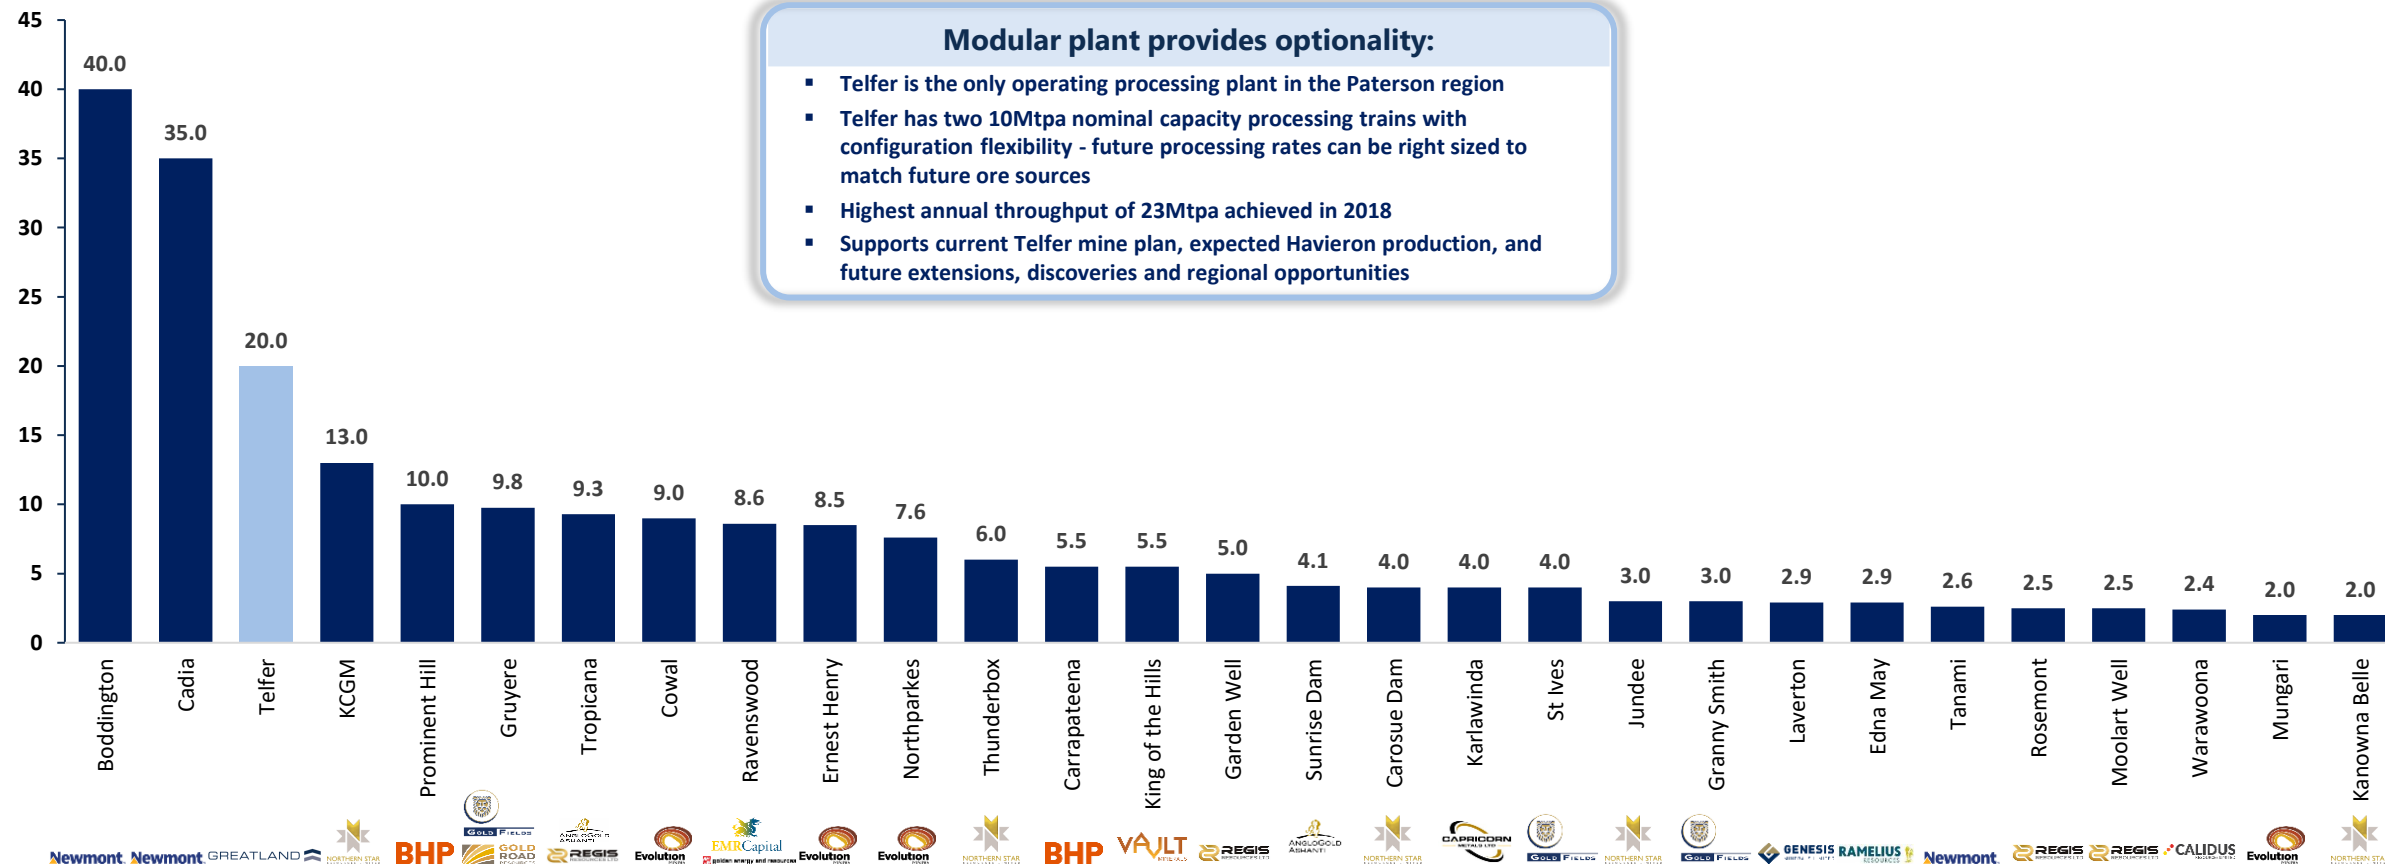

Telfer - established mine & infrastructure

Telfer is the third largest gold or gold-copper processing capacity in Australia

Australian Gold or Gold-Copper Plant Processing Capacity

Plant throughput (Mtpa)

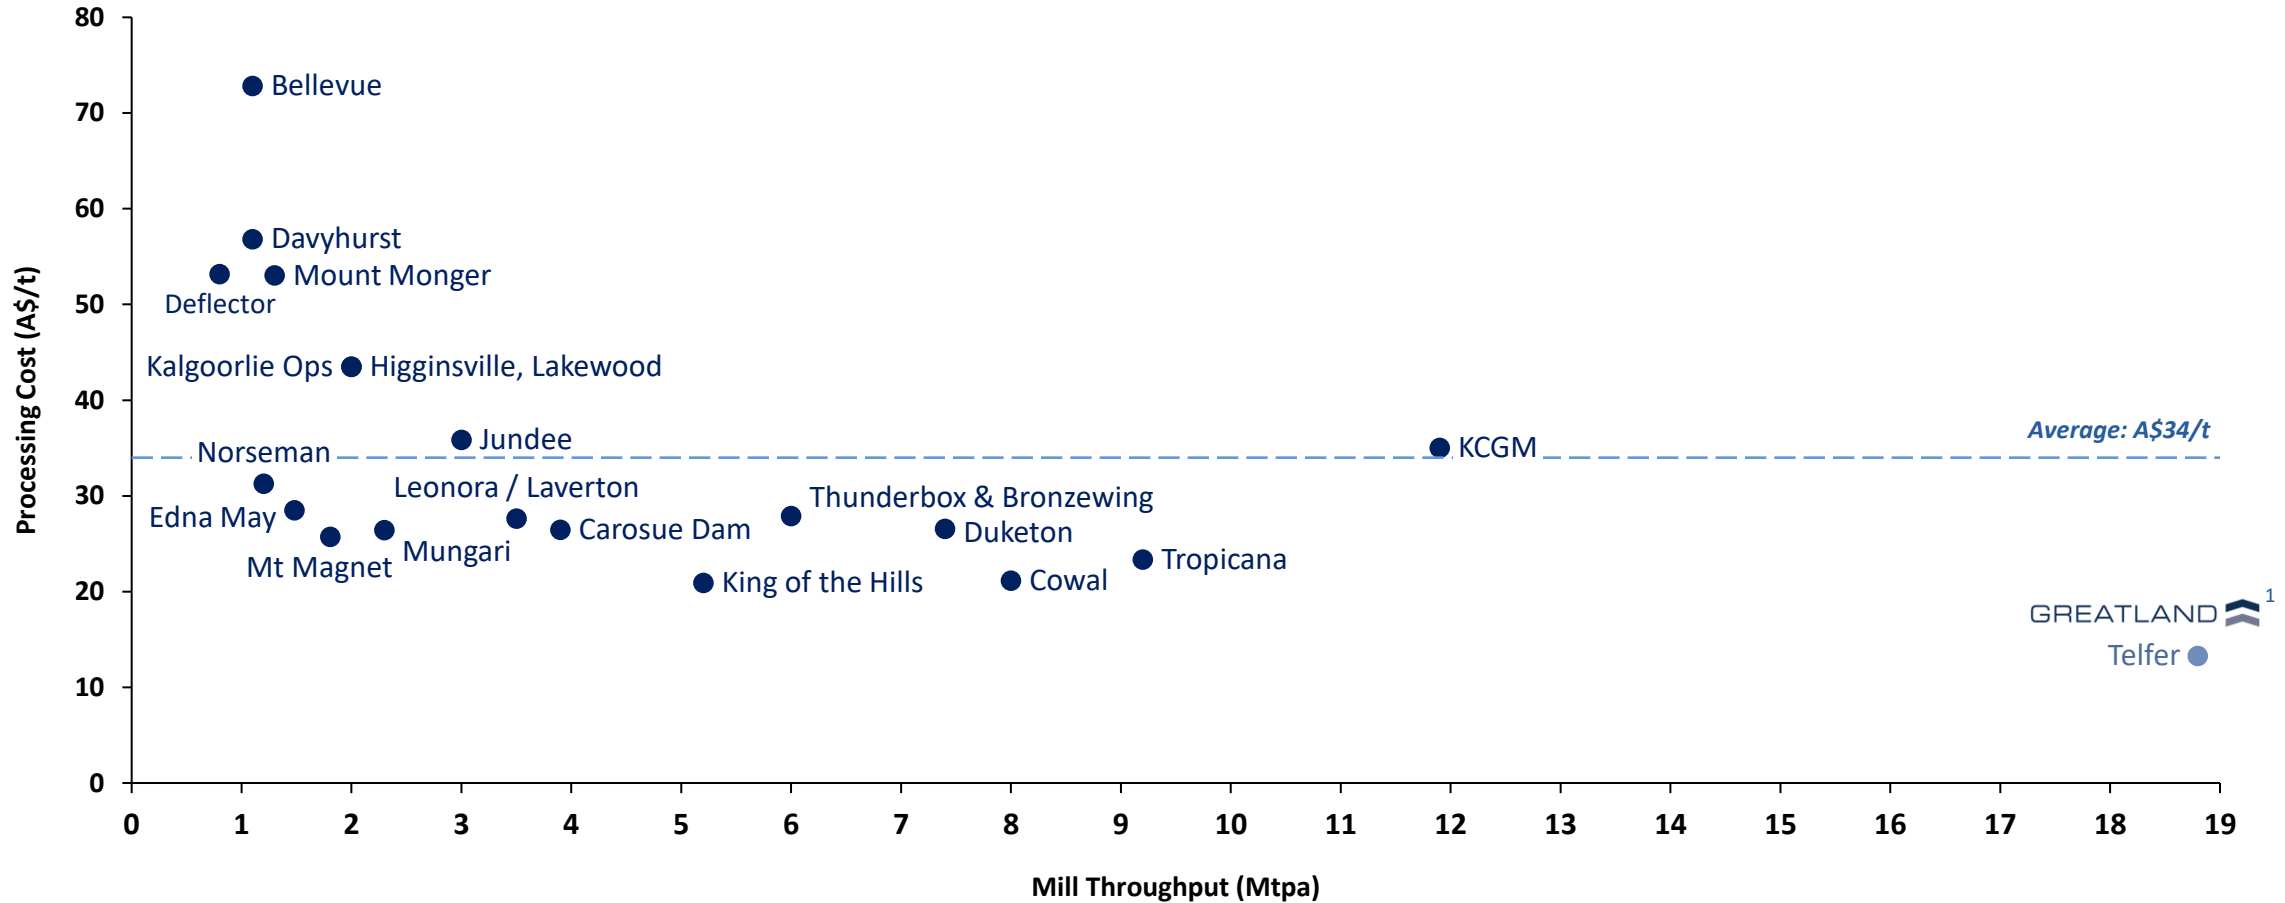

Data sourced from respective companies' filings and publicly available data. Refer to Appendix in slide 41 for details.

Economies of scale enable sector leading processing cost efficiency

Telfer is largest and lowest cost processing facility amongst Australian ASX listed gold mines

ASX Australian Gold Mines – FY25 Processing Cost (A\$/t) and Mill Throughput (Mtpa)

Data sourced from respective companies' filings and publicly available data for the FY25 period. Primary listed ASX companies only (excludes Newmont). Refer to Appendix in slide 42 for details.

(1) Data for the FY25 ~7-month Greatland ownership period commencing Dec'24 to 30 June 2025 annualised on a full year basis.

Greatland driving operational performance at Telfer

Improved outcomes being achieved - greater focus by a mid-tier mining company compared to a major

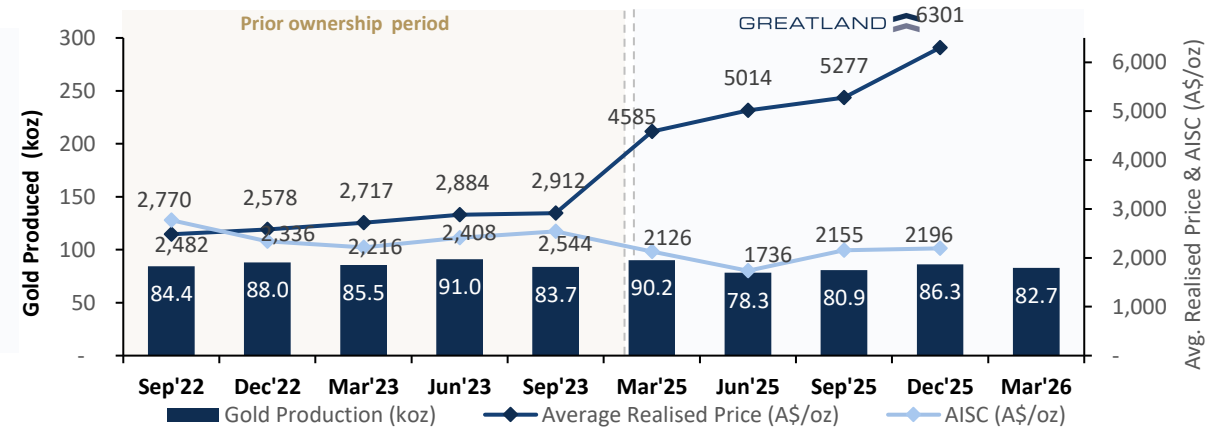

Gold recovery¹

Highest gold recovery across the last 5 years achieved under Greatland ownership

Production and margin^{4,5}

Significant margin expansion under Greatland from price and AISC improvement

Safety

Significant improvement since Greatland assumed ownership in Dec'24

Open pit material movements⁶

Substantial uplift in open pit productivities

(1) For the historical periods FY21-23, Telfer annual recovery rates data based on Newcrest's quarterly reports data which was then converted to a weighted average to translate into FY basis.

(2) Historical data for FY24 is not shown, due to processing operations interruptions under Newmont's ownership rendering the period non-representative. Greatland ownership period commenced 4 December 2024, refer to ASX Announcement "December 2025 Quarterly Activities Report" released to ASX on 28 January 2026.

(3) TRIFR on a 12-month moving average basis, refer to ASX Announcement "December 2025 Quarterly Activities Report" released to ASX on 28 January 2026.

(4) For the historical quarterly periods Sep'22-Sep'23, Telfer quarterly data based on Newcrest Mining Limited (Newcrest) quarterly reports. Average Realised Price and AISC quoted originally in US\$/oz basis, converted to A\$/oz based on respective A\$:US\$ exchange rates assumed in the quarterly reports.

(5) AISC reported under Newcrest period based on gold sold whereas Greatland's quarterly AISC based on gold produced refer to ASX Announcement "December 2025 Quarterly Activities Report" released to ASX on 28 January 2026 and "March 2026 Quarter Production Update" released on 7 April 2026.

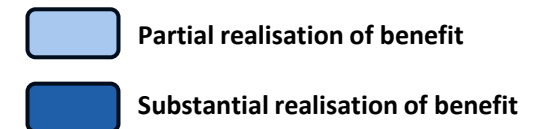

(6) Refer to ASX Announcement "December 2025 Quarterly Activities Report" released to ASX on 28 January 2026 and "March 2026 Quarter Production Update" released on 7 April 2026.

Investment is being made across mine development, infrastructure and fleet for multi-year life extension at Telfer

FY26 Telfer growth capital guidance of \$230 – 260m¹ to fund key investments in further life extension

Investing in Telfer's multi-year life extension

FY26 Telfer Growth Capital ¹	FY26	FY27	FY28	FY29+
	Expected periods of benefit			
 TSF8 Stage 3 and 4 lifts				
 West Dome Open Pit pre-stripping (Stage 7 Extension)				
 Purchase and refurbishment of open pit fleet equipment				
 Underground growth development (WDU, ESC ext, Rey ext, South West, Western Flanks ext, A-Reefs ext)

(1) ASX Announcement 30 March 2026 "2025 Group Mineral Resource Statement". See slide 40 for further details.

240km Telfer drilling planned in FY26, the largest program in its history

Targeting extensions and conversions at West Dome open pit, Main Dome underground and West Dome Underground

Telfer drilling by financial year (km)¹

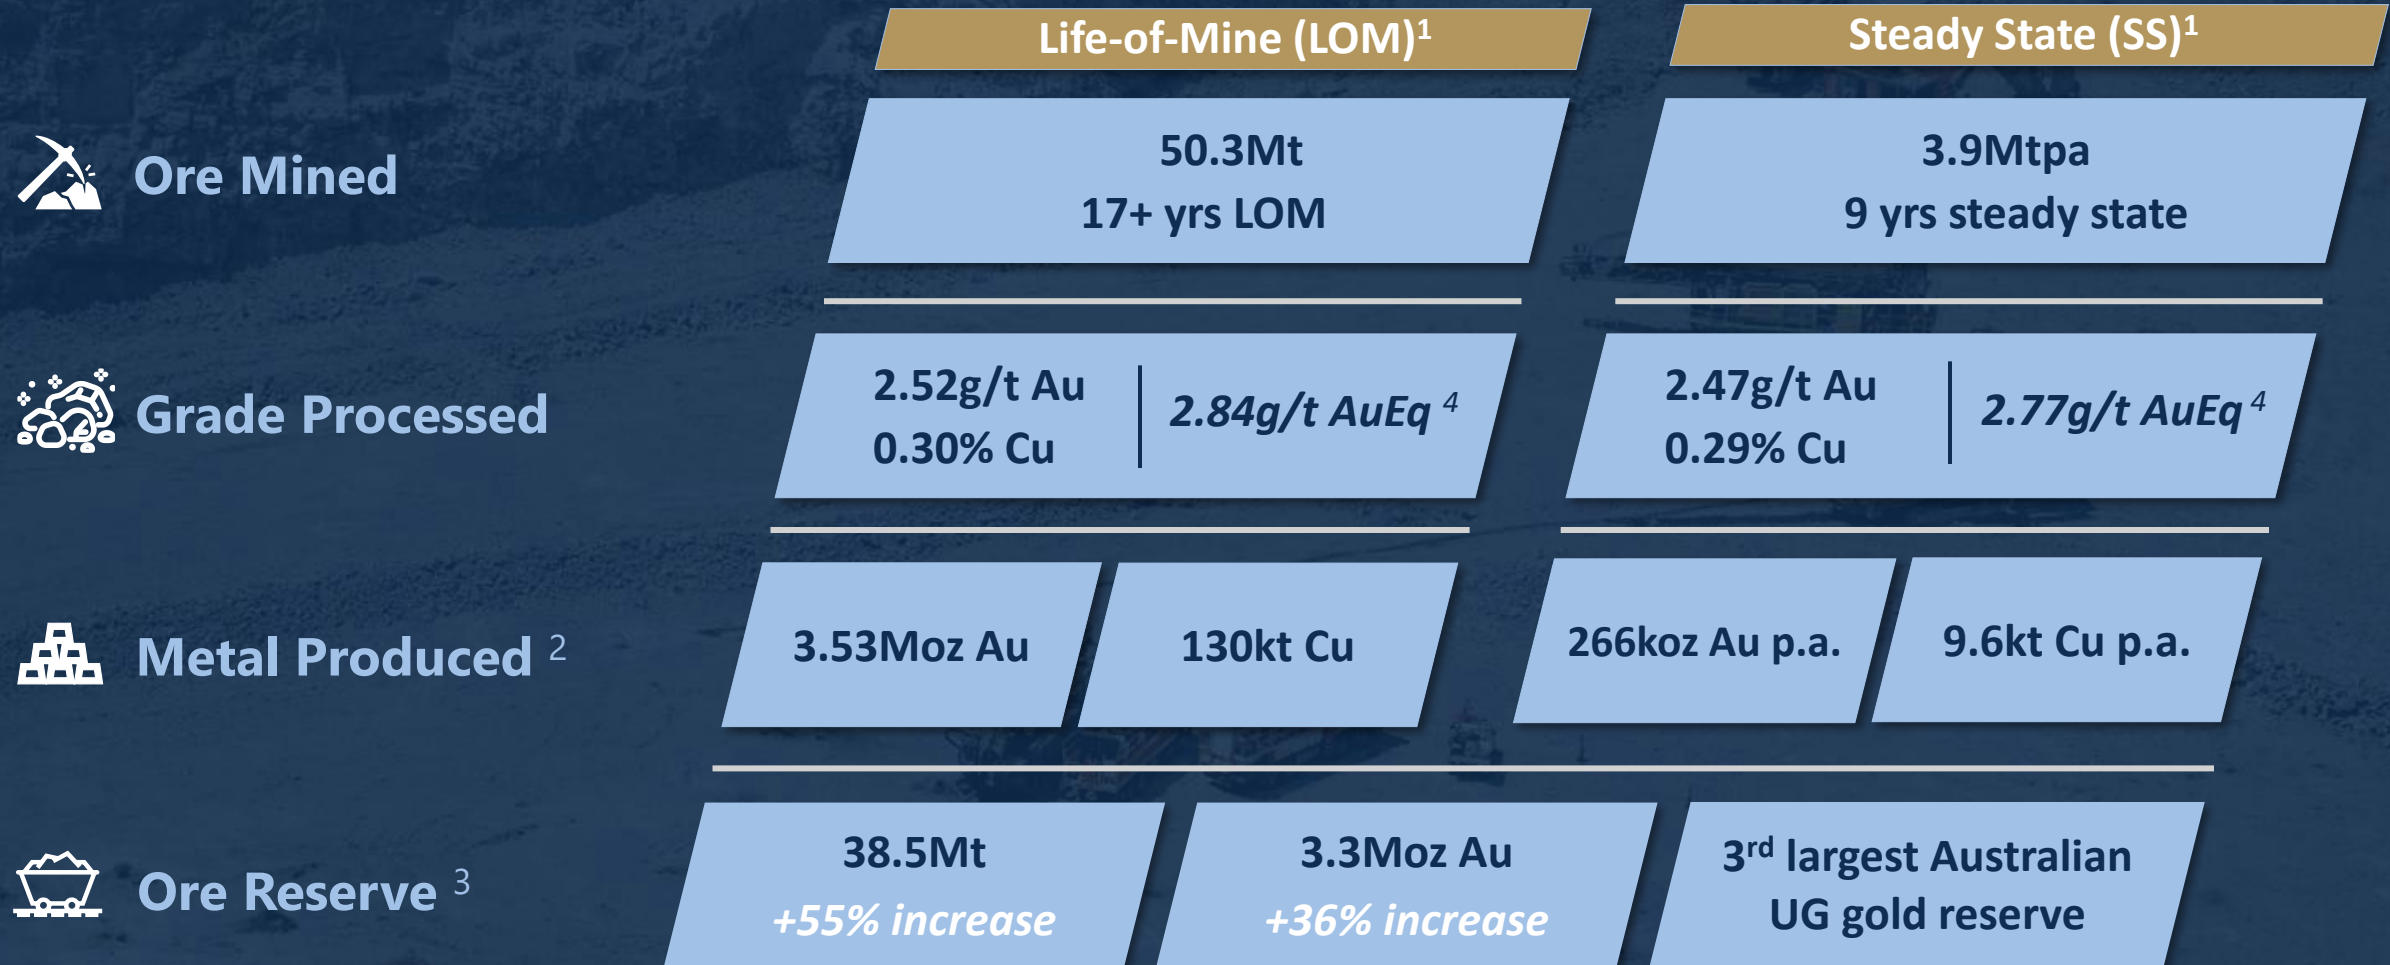

- 1 West Dome Open Pit**
 - Aiming to expand the existing Stage 7 cutback
 - Potential extension of Stage 2 to support multi-year extension of current mine life
- 2 West Dome Underground**
 - One of the most exciting discoveries at Telfer following success of inaugural underground drilling
 - Extensive drilling program proposed targeting conversion of a central 600m strike length
- 3 Main Dome Underground**
 - Aiming to bring multiple near mine extensions (A-Reefs, M-Reefs, Rey, LLU) to mine ready status and new opportunities such as ESC, Kylo

(1) ASX Announcement 29 July 2025 "June 2025 Quarterly Activities Report"

**Havieron – a
world class asset**

Physicals

Note: All "\$" values mentioned in this presentation are in Australian Dollars, unless specified

The Feasibility Study Mine Plan (and the forecast financial information derived from it) is a Production Target that includes approximately 13% Inferred Mineral Resource and 5% Exploration Target over the life of mine (on a contained gold basis). Refer to section on "Production Target" in the announcement "Havieron Project Feasibility Study" dated 1 December 2025, and the cautionary statement on slide 3.

(1) Life-of-Mine (LOM) refers to period from first ore production until final ore production, which the Havieron Feasibility Study contemplates as a 17+ year LOM. Steady State (SS) period refers to the 9-year period post pre-production and ramp-up, from Year 4 to 12 (inclusive), once the development of the conveyor decline is completed and the underground crusher and material handling system is installed and commissioned (refer slide 36).

(2) Recovered gold and copper metal after LOM assumed recoveries of 86.6% for gold and 84.0% for copper.

(3) Latest Havieron Ore Reserve published in the announcement 'Havieron Project Feasibility Study' released to ASX on 1 December 2025 comprising 38.5Mt at 2.63g/t Au, 0.33% for contained gold of 3.3Moz Au and 128kt Cu. Increase shown relative to the Havieron March 2022 Ore Reserve Estimate, as set out in Greatland's Prospectus dated 30 May 2025. Refer Appendix in slides 44-45 for comparison data.

(4) The gold equivalent (AuEq) grade is based on assumed prices of A\$4,500/oz Au and A\$15,747/t Cu and metallurgical recoveries based on block metal grade, reporting approximately 86.6% for Au and 84.4% for Cu which equates to a formula of approximately : AuEq = Au (g/t) + 1.06* Cu (%).

Financial outcomes – Havieron Standalone base case

Outcomes under the conservative 'Havieron Standalone' base case operating cost model that assumes no extension of the current Telfer mine life

	A\$4,500/oz Long Term Gold	A\$6,250/oz Spot Gold
Free Cash Flow (post-tax, unlevered) ¹	\$5.4 billion	\$9.6 billion
NPV (5%, post-tax, unlevered) ¹	\$2.9 billion	\$5.4 billion
IRR (post-tax, unlevered) ¹	22.5%	31.5%
Payback (post-tax) ^{1,2}	4.2yrs	3.2yrs

Note: All "\$" values mentioned in this presentation are in Australian Dollars, unless specified.

Base case price assumptions: Consensus based gold pricing to FY31, then A\$4,500/oz long-term gold price in FY32 and subsequent years. Copper price is based on US\$5/lb converted at consensus based AUD:USD, equal to A\$15,747/t long-term copper. Spot case price assumptions: A\$6,250/oz gold price in all years, same copper price as the base case. Refer to the appendix in slide 47 for assumptions by year.

The Feasibility Study Mine Plan is a Production Target that includes approximately 13% Inferred Mineral Resource and 5% Exploration Target over the life of mine (on a contained gold basis). Refer to section on "Production Target" in the announcement "Havieron Project Feasibility Study" dated 1 December 2025, and the cautionary statement on slide 3.

(1) Assumes a Havieron Standalone operating cost scenario (refer slide 24 for further details).

(2) Time period from first revenue until breakeven free cash flow (post-tax) is achieved.

Pairing Australia's 2nd largest gold project with 3rd largest gold-copper processing facility

Havieron is one of Australia's largest undeveloped high-grade gold projects...

... being paired with Telfer, the third largest gold or gold-copper processing capacity mill in Australia

Havieron Ore Reserve

Australia's largest underground reserve outside of a Major, at a conservative A\$2,500/oz gold price

Refer to Appendices in slides 44-45 for comparison data sources.

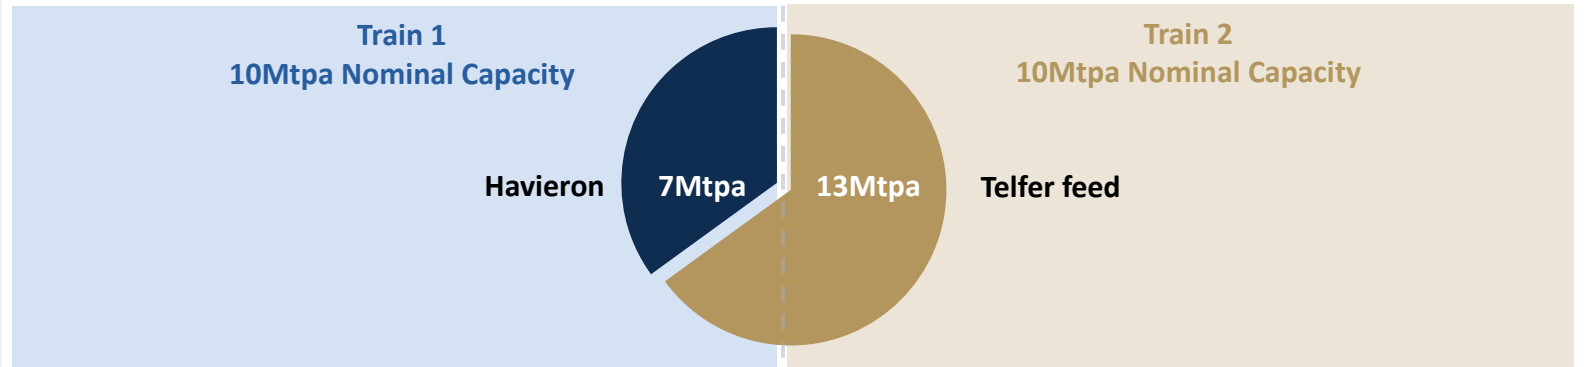

(1) The gold equivalent (AuEq) grade and contained ounces for Havieron is based on assumed prices of A\$4,500/oz Au and A\$15,747/t Cu and metallurgical recoveries reporting approximately 86.6% for Au and 84.4% for Cu which equates to a formula of approximately AuEq = Au (g/t) + 1.06* Cu (%). Same formula adopted for Cadia and Northparkes to convert contained copper tonnage in the Ore Reserve Estimate to gold equivalent grade (g/t AuEq) and contained gold (Moz AuEq).

Illustrative 'Telfer Hub' operating cost scenario

Co-processing of Havieron ore with feed from Telfer, utilising surplus Telfer processing plant capacity

Illustrative scenario: Havieron ore is co-processed with feed from Telfer

- Havieron utilises ~70% of Train 1 capacity in steady state (~7Mtpa nominal capacity), due to finer grind size than applied for Telfer ore (~35% of total nominal capacity of 20Mtpa)
- Telfer feed is co-processed using some or all of the residual ~13Mt capacity on Trains 1 and 2

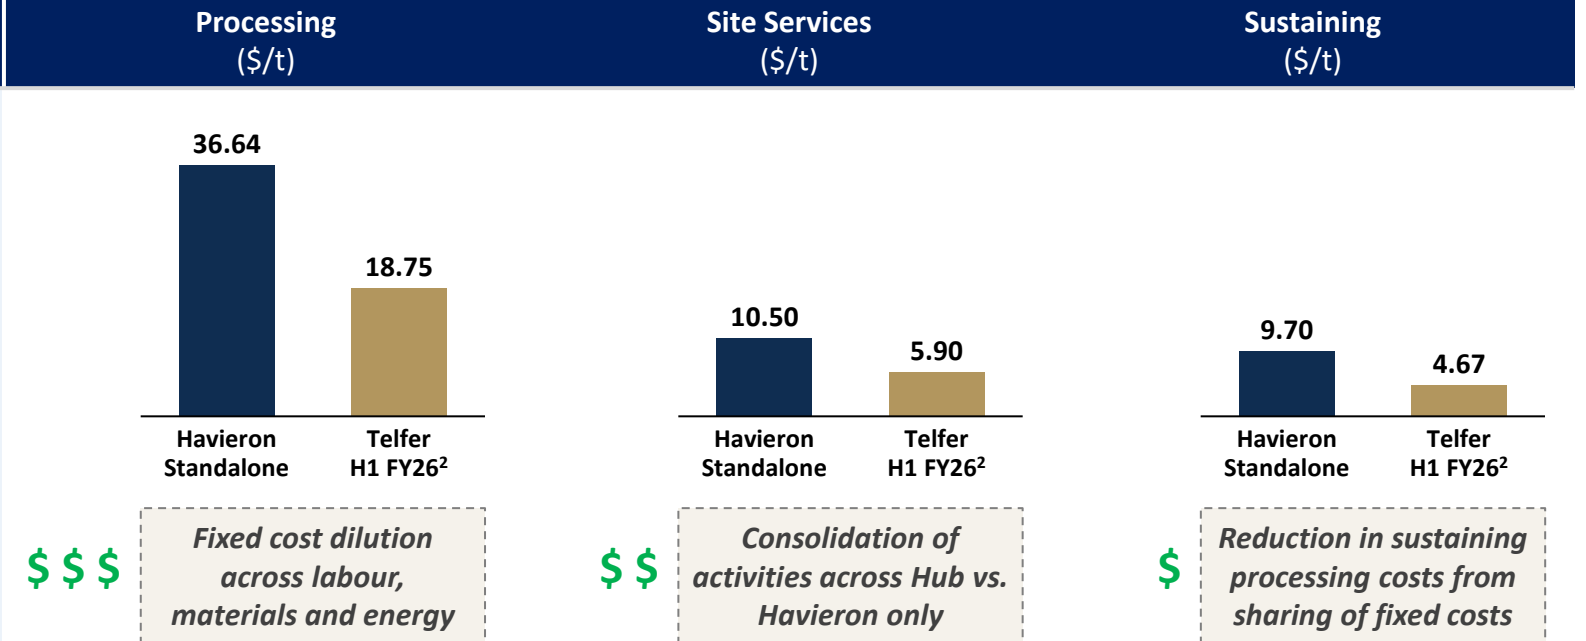

Potential operating cost savings

FS Havieron Standalone costs assume no extension of current Telfer mine life, steady state Havieron using ~35% of Telfer processing capacity.

Resulting FS operating costs for processing, site services and sustaining capital on a per tonne basis are therefore substantially higher than current Telfer operating costs (shown adjacent for the H1 FY26)

If a Telfer Hub scenario is achieved, Havieron's AISC may be lower due to material potential fixed cost savings, in particular across processing, site services and sustaining capital

\$ symbols are indicative only to illustrate the relative opportunity for potential savings across the components

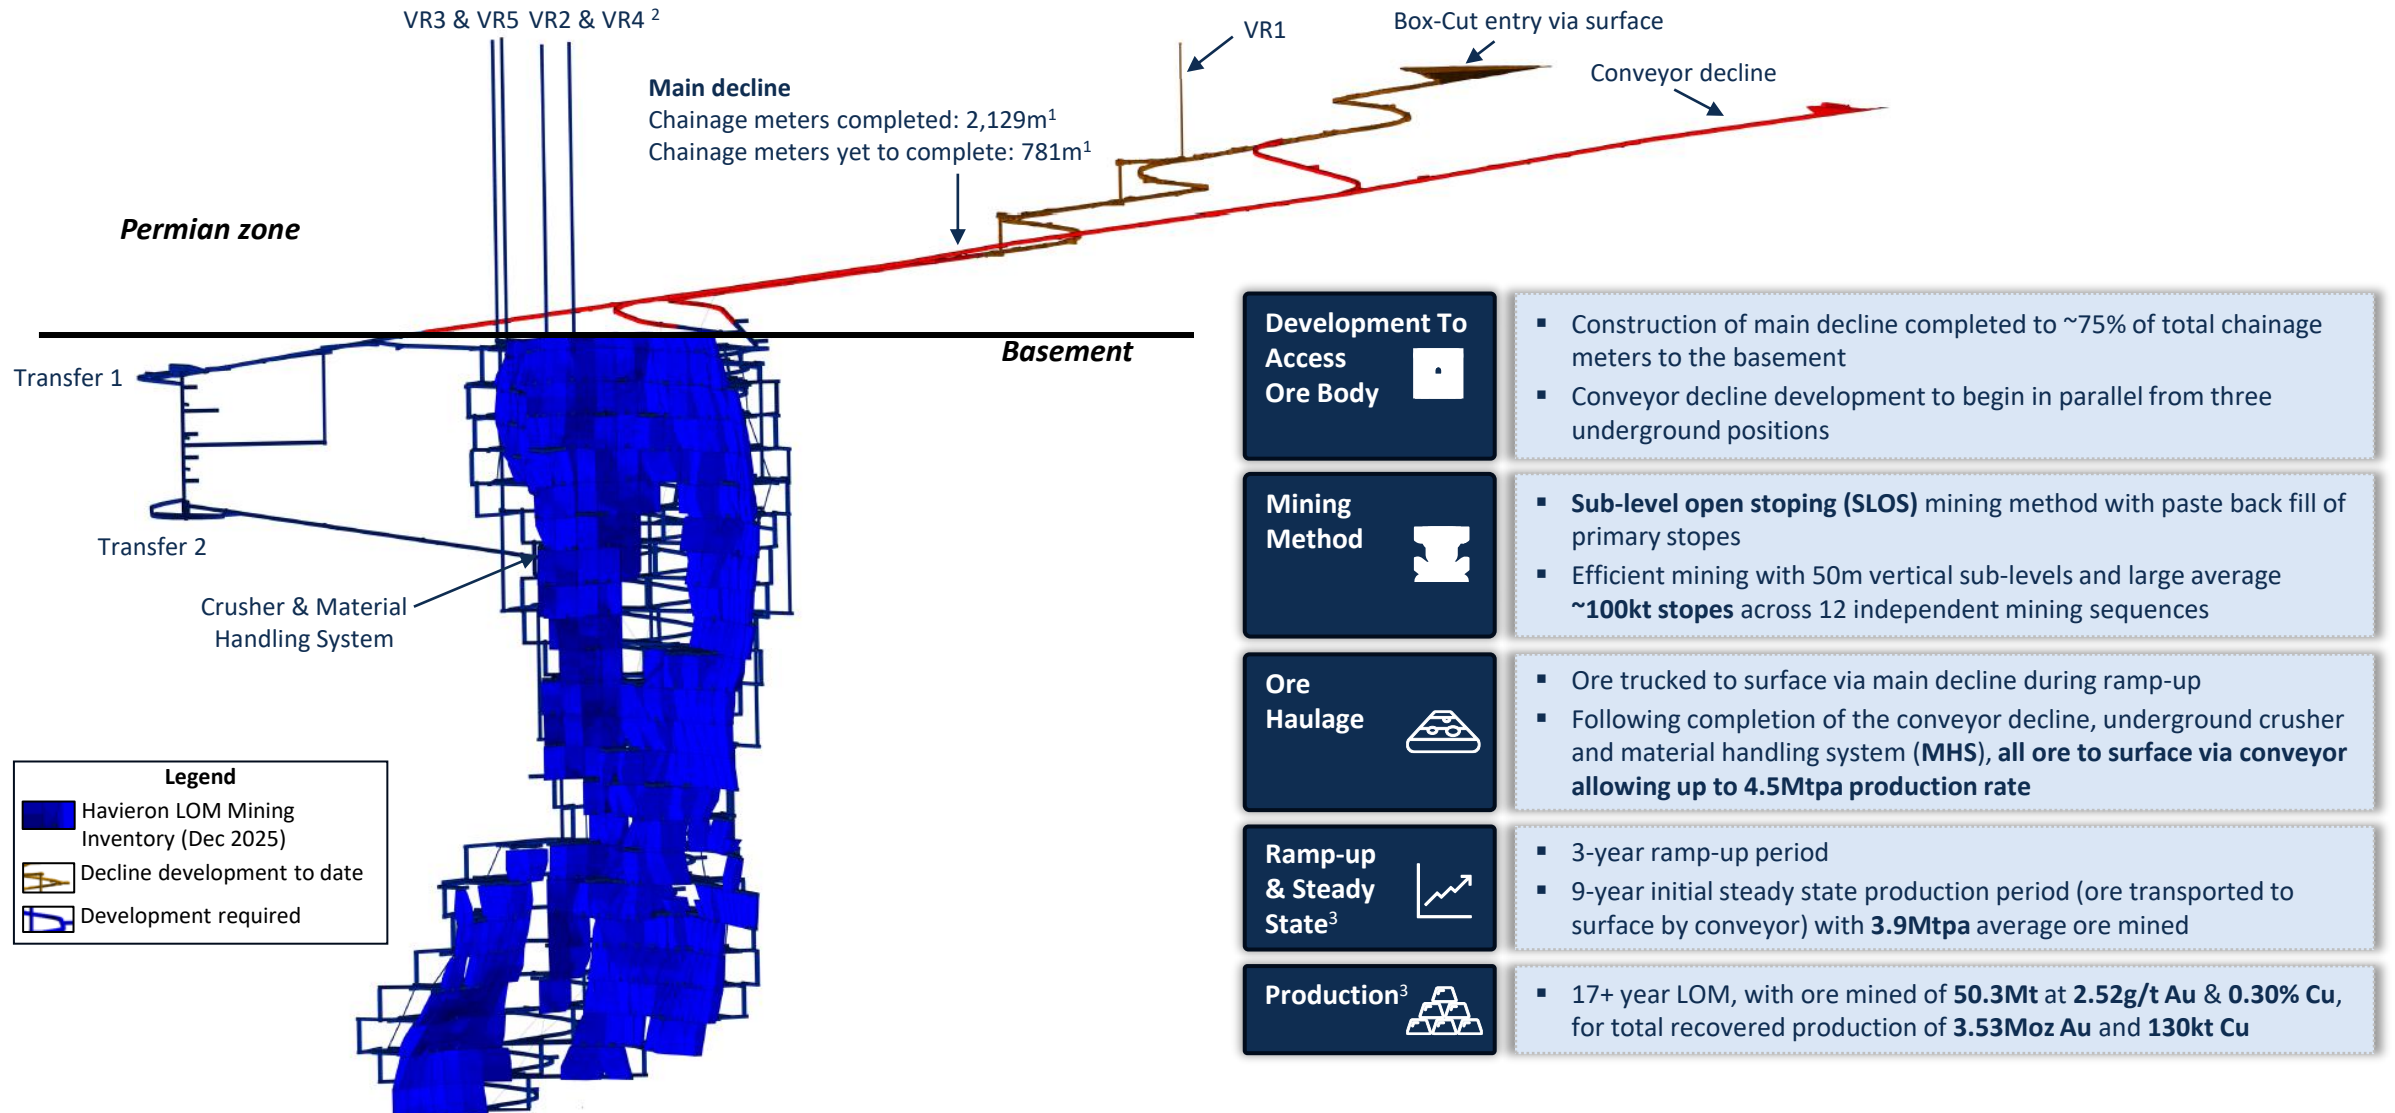

Note: All "\$" values mentioned in this presentation are in Australian Dollars, unless specified

(1) The FS assessed an alternative 'Telfer Hub' operating cost scenario, in which with the remaining 65% (~13Mtpa) processing plant capacity is assumed to be fully utilised by ore feed from Telfer, which demonstrated material potential operating cost savings for Havieron by the sharing of fixed cost components particularly for processing, site services and sustaining capital. The financial outcomes of this scenario are not presented in this presentation. Refer sections '17. Operating Cost Estimate & AISC' and '22.2. Telfer mine life extension & Telfer Hub' in the ASX announcement 'Havieron Project Feasibility Study' dated 1 December 2025).

(2) Telfer actual operating costs shown as comparable figures based on H1 FY26 operating results during which the Telfer Mill was operated at an annualised processing rate of ~18Mtpa. Refer to announcement 'December 2025 Quarterly Activities Report' dated 28 January 2026.

Havieron underground development and mine plan

Large scale Sub Level Open Stope mining with efficient conveyor haulage materials handling system

Havieron underground development mining inventory and development plan as per ASX announcement 'Havieron Project Feasibility Study' on 1 December 2025

(1) Decline development to date and yet to be completed as at 1 December 2025.

(2) VR refers to ventilation raises.

(3) The Feasibility Study Mine Plan (and the forecast financial information derived from it) is a Production Target that includes approximately 13% Inferred Mineral Resource and 5% Exploration Target over the life of mine (on a contained gold basis). Refer to section on "Production Target" in the announcement "Havieron Project Feasibility Study" dated 1 December 2025, and the cautionary statement on slide 3.

Strong funding position

Havieron development expected to be fully funded from existing cash, ongoing Telfer cash flow, and A\$500 million corporate debt commitment

1

Strong Cash Position

1. Cash: **\$1,208m** (at 31 March 2026)
2. Borrowings: **Nil** (at 31 March 2026)¹

2

Telfer Cash Flows

Telfer generated **\$1,063 million** cash build in 15 months:

3

Corporate Debt

Commitment Letter signed for a Syndicated Debt Facility with Tier 1 banks²:

1. **Revolving Credit Facility (RCF) – Facility A**
\$250m, 5-year tenor (from Facility A financial close)
 - Working capital and general corporate purposes of the group including construction, development and operation of Havieron
2. **Revolving Credit Facility (RCF) – Facility B**
\$225m, 7-year tenor (from Facility A financial close)
 - Same utilisation conditions as above
3. **Contingent Instrument Facility (CIF)**
\$25m
 - To issue bank and performance guarantees to key counterparties

Financial close subject to customary conditions precedent including, execution of full form documentation, finalisation of lender technical and environmental DD. Financial close of Facility B also subject to receipt of primary environmental approvals and FID. CIF tenor is 5-years from Facility A financial close, extended to 7-years if Facility B closes

Corporate facilities deliver greater flexibility than project finance facilities

Achieved tenor of up to 7 years, reflecting asset quality and long life

Expanded banking group to five Tier-1 banks

Right-sized facilities to \$500m (from \$775m) reflecting Telfer's significant cash at bank and ongoing cash generation

Exceptional pricing outcome
No mandatory hedging required

(1) \$16.5 million in bank guarantees drawn under the \$25 million contingent instrument facility as at 31 December 2025.

(2) Greatland has executed a commitment letter for A\$500m in corporate debt facilities with a lending syndicate of ANZ, HSBC, ING, NAB and Westpac, which is a binding but conditional commitment for the provision of those facilities. Conditions precedent to financial close under the facilities include the finalisation and execution of a facility agreement (on terms consistent with an agreed long form term sheet), finalisation of technical and environmental due diligence by the lenders and financial close of Facility A occurring within 3 months from execution of the facility agreement. Financial close under Facility B is additionally subject to conditions precedent relating to the receipt of primary environmental approvals for Havieron, the announcement of a final investment decision relating to the development of Havieron and completion of the update on Telfer JORC resources and reserves, within 12 months of the execution of the facility agreement. Refer to the announcement 'Havieron Project Feasibility Study' released to ASX on 1 December 2025 for further detail on the terms of the debt commitment.

Investment proposition

A leading Australian gold-copper producer with a platform for growth

Production

Telfer is a top 10 Australian gold-copper asset with significant life extension opportunity

Mine life

World class Havieron development expected to create a leading long-life, low-cost Australian gold-copper mine

Infrastructure

Leveraging the scale and flexibility of Telfer's regionally significant processing infrastructure

Funding

Strong balance sheet with available liquidity of \$1.28b, including \$1.2b cash¹

Growth

Investing in exploration and resource growth to extend mine life and test new targets

(1) As at 31 March 2026. Refer to ASX Announcement "March 2026 Quarter Production Update" released to the ASX on 8 April 2026.

GREATLAND

 **in**

Executive team

Shaun Day

Managing Director

- Mining and infrastructure focused finance executive
- Previously CFO of Northern Star Resources, Sakari Resources and Straits Resources

Otto Richter

Acting Chief Operating Officer

- Mining engineer with extensive open pit and underground experience in Australia and overseas
- Former consultant providing broad ranging technical advise and in house for multiple miners

Monique Connolly

Chief Financial Officer

- Qualified Chartered Accountant with experience across public companies
- Former senior finance positions at ConocoPhillips and Santos

Rowan Krasnoff

Chief Development Officer

- M&A, financings, joint ventures and investments transactions specialist
- Previously Business Development Manager at Fortescue Ltd

Matt Kwan

General Counsel

- 20+ years' experience as general counsel and M&A / ECM lawyer
- Previously General Manager Legal at Aquila Resources

Damien Stephens

Group Geologist

- Geologist with a focus on precious and base metals exploration globally
- Multiple Exploration Manager roles including Australia for Sandfire Resources

Ben Secrett

CoSec & Head of Sustainability

- Lawyer with deep governance credentials
- Previously corporate lawyer/advisory

Andrew Bowler

Head of Investor Relations

- Geologist with operating experience
- Former Research Analyst at Macquarie

Board of Directors

Mark Barnaba

Non-Executive Chairman

- Deputy Chairman of Fortescue Ltd
- Previously Board Member of the Reserve Bank of Australia

Elizabeth Gaines

Non-Executive Deputy Chair

- Previously Chief Executive Officer and current Executive Director of Fortescue Ltd
- Non-Executive Director of Victor Chang Cardiac Research Institute and West Coast Eagles (AFL)

Jimmy Wilson

Non-Executive Director

- Mining engineer with deep operational experience
- Previously President of Iron, Energy Coal and Stainless-Steel Materials at BHP

Paul Hallam

Non-Executive Director

- Previously Director of Operations at Fortescue Metals Group
- Previously Executive General Manager of Development and Projects at Newcrest

Alex Borrelli

Non-Executive Director

- Chartered Accountant with extensive investment banking experience
- Director of Bradda Head Lithium and other companies in the mining sector

Yasmin Broughton

Non-Executive Director

- Extensive experience in corporate law, M&A, governance, risk management and compliance
- Non-Executive Director of Fortescue Ltd, Synergy and Wright Prospecting

Experienced technical leadership team

Greatland has assembled an experienced technical leadership team with a strong track record

Employee	Greatland Position	Prior roles include	Years of experience
 Shaun Day	Managing Director	CFO <i>Northern Star</i>	25+
 Otto Richter	Acting COO	Mining engineering consultant - Australian & international, open pit & underground. Group study manager <i>Resolute</i> . Planning manager at Telfer (Newcrest)	25+
 Mark Benson	GM Telfer	Manager Assets, Manager Projects at KCGM ¹ , Processing Manager SKO ² <i>Northern Star</i> ; GM Operations & Maintenance, <i>Primero</i> , Commissioning & Operation, Telfer	25+
 Shaun McLoughney	Havieron UG Manager	GM Projects & Growth, GM Pogo, SKO ¹ & Paulsens <i>Northern Star</i>	30+

Employee	Greatland Position	Prior roles include	Years of experience
 Damien Stephens	Group Geologist	Senior exploration and development roles with <i>Iamgold, Dalradian, Westgold and Sandfire</i>	25+
 Michael Thomson	Principal Geologist	Senior Geologist, <i>Creasy Group</i>	25+
 David Fielder	Havieron Project Manager	Operations Manager, <i>CPC Engineering</i> ; Engineering Manager, <i>Sedgman, Cimvec, Primero</i>	20+
 Chris Pyke	Project Manager	Project Manager, <i>Northern Star</i>	30+

(1) Kalgoorlie Consolidated Gold Mines.

(2) South Kalgoorlie Operations.

FY26 Guidance and YTD Performance

Production around, or slightly above, the upper end of the range, lower end of range for AISC

Gold Production

260-310koz Au

YTD: 249.9koz (to March 31 2026)

AISC

\$2,400-\$2,800/oz Au

YTD: \$2,176/oz (to Dec 31 2025)

Growth Capex

Telfer

\$230-260m

YTD: \$131.1m (to Dec 31 2025)

Havieron *Pre-FID*

\$60-70m

YTD: \$29.8m (to Dec 31 2025)

Exploration & Resource Development

\$55-60m

YTD: \$16.1m (to Dec 31 2025)

Note: All "\$" values mentioned in this presentation are in Australian Dollars, unless specified
YTD is a reference to the period 1 July 2025 to 31 December 2025 for all metrics except production which is for the period 1 July 2025 to 31 March 2026.

Q3 FY26 preliminary results¹ – At a glance

Highlights

- Production of 82,723oz Au and 4,128t Cu (YTD FY2026: 249,887oz Au and 11,022t Cu).
- Sales of 97,800oz Au and 4,620t Cu (YTD FY2026: 252,212oz Au and 10,333t Cu).
- **Cash at 31 March 2026 of \$1,208 million** (31 December 2025: \$948 million) and nil debt which represents a **cash build of \$260 million** for the quarter, after capital expenditure, and a cash payment of \$73 million for tax related to the FY25 period.
- Greatland maintains **full upside exposure to the gold price**, with partial downside price protection provided from gold put options.

Key commentary

- Telfer is **not currently impacted by diesel supply disruptions** with fuel supplied directly by a global oil major on a long-term contract via Port Hedland.
- Telfer's processing plant **power is generated onsite by natural gas** that is delivered via the Pilbara Pipeline System ex Port Hedland, from Western Australian natural gas production. Telfer's underground operation utilises an electric shaft hoist, reducing diesel intensity of Greatland's highest-grade ore sources.
- Telfer maintains significant **surface stockpiles of 22Mt @ 0.36g/t Au & 0.05% Cu** estimated at the end of March 2026, equal to more than **12 months of mill feed**.
- Greatland currently expects full-year FY26 production **around, or slightly above, the upper end of the production guidance range of 260,000 – 310,000oz Au**.

Note: All "\$" values mentioned in this presentation are in Australian Dollars, unless specified

(1) Refer to ASX Announcement "March 2026 Quarter Production Update" released on 7 April 2026.

O'Callaghans at a glance

O'Callaghans is one of the largest high-grade tungsten deposits globally with strategic advantages supporting development

O'Callaghans is a key strategic asset for Greatland

Deposit overview

- 100% owned polymetallic skarn deposit containing tungsten, copper, zinc and lead
- Located c.10km south of the Telfer mine in the Paterson Province, sitting c.300m below surface with a mineralization layer of up to 60m thick

Global significant and market strength

- ✓ O'Callaghans is a globally significant Tungsten deposit and the most significant in Australia by scale and grade
- ✓ The deposit is differentiated by its large-scale, high grade and location in a stable, well-regulated mining jurisdiction

Strategic portfolio positioning and development readiness

- ✓ Asset sits within Greatland's approved mining lease, providing significant tenure advantage and the ability to leverage existing footprint and infrastructure for development
- ✓ A Pre-Feasibility Study completed by Newcrest in 2014 demonstrated a technically and economically viable long-life underground mining operation

2025 O'Callaghans Mineral Resource Statement^{1,2}

Classification	Tonnes (Mt)	Tungsten Trioxide (WO ₃)		Copper		Zinc		Lead	
		Grade (%)	Metal (kt)	Grade (%)	Metal (kt)	Grade (%)	Metal (kt)	Grade (%)	Metal (kt)
Indicated	65	0.35	232	0.30	195	0.58	358	0.28	176
Inferred	4	0.31	14	0.28	12	0.39	13	0.19	7
Total	70	0.35	246	0.30	207	0.57	371	0.28	182

(1) ASX Announcement as at 30 March 2026 "December 2025 O'Callaghans Mineral Resource Statement"

(2) Mineral Resources as reported 31 December 2025, grades are reported to two decimal places to reflect appropriate precision in the estimate, and this may cause apparent discrepancies in totals. Cutoffs for the O'Callaghans MRE are applied based on a NSR using metal prices of US\$25.74 lb W (equivalent to ~US\$450/MTU ATP), US\$4.54 lb Cu, US\$1.27 lb Zn and US\$0.93 lb Pb.

Note: For visual effect, bubble size and chart LHS data represents same data. O'Callaghans Mineral Resources Estimate (MRE) based on Newcrest's annual Mineral Resources Estimate (MRE) and Ore Reserve Estimate (ORE) as at 30 June 2023 released 11 Aug 2023. Equivalent based on following spot prices: APT: A\$900/mtu OR a\$90,000/t, Cu A\$19,866/t, Zinc: A\$4,701/t, Lead: A\$3,015/t

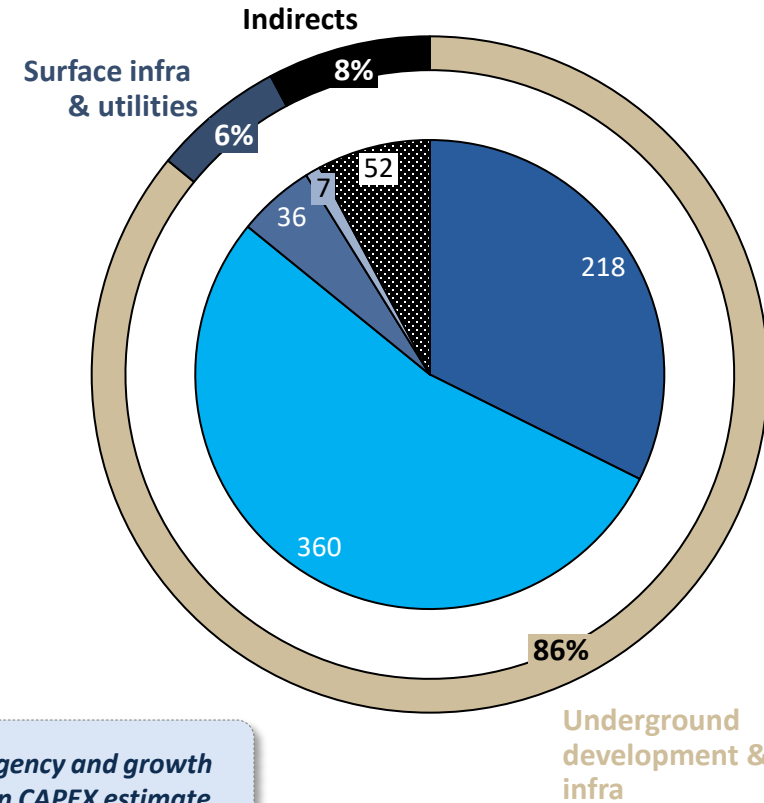

Havieron Capex breakdown

Pre-Production capex delivers single decline trucking operation, Expansion capex delivers a second decline with conveyor haulage

Pre-Production CAPEX: A\$1,065m

Expansion CAPEX: A\$673m

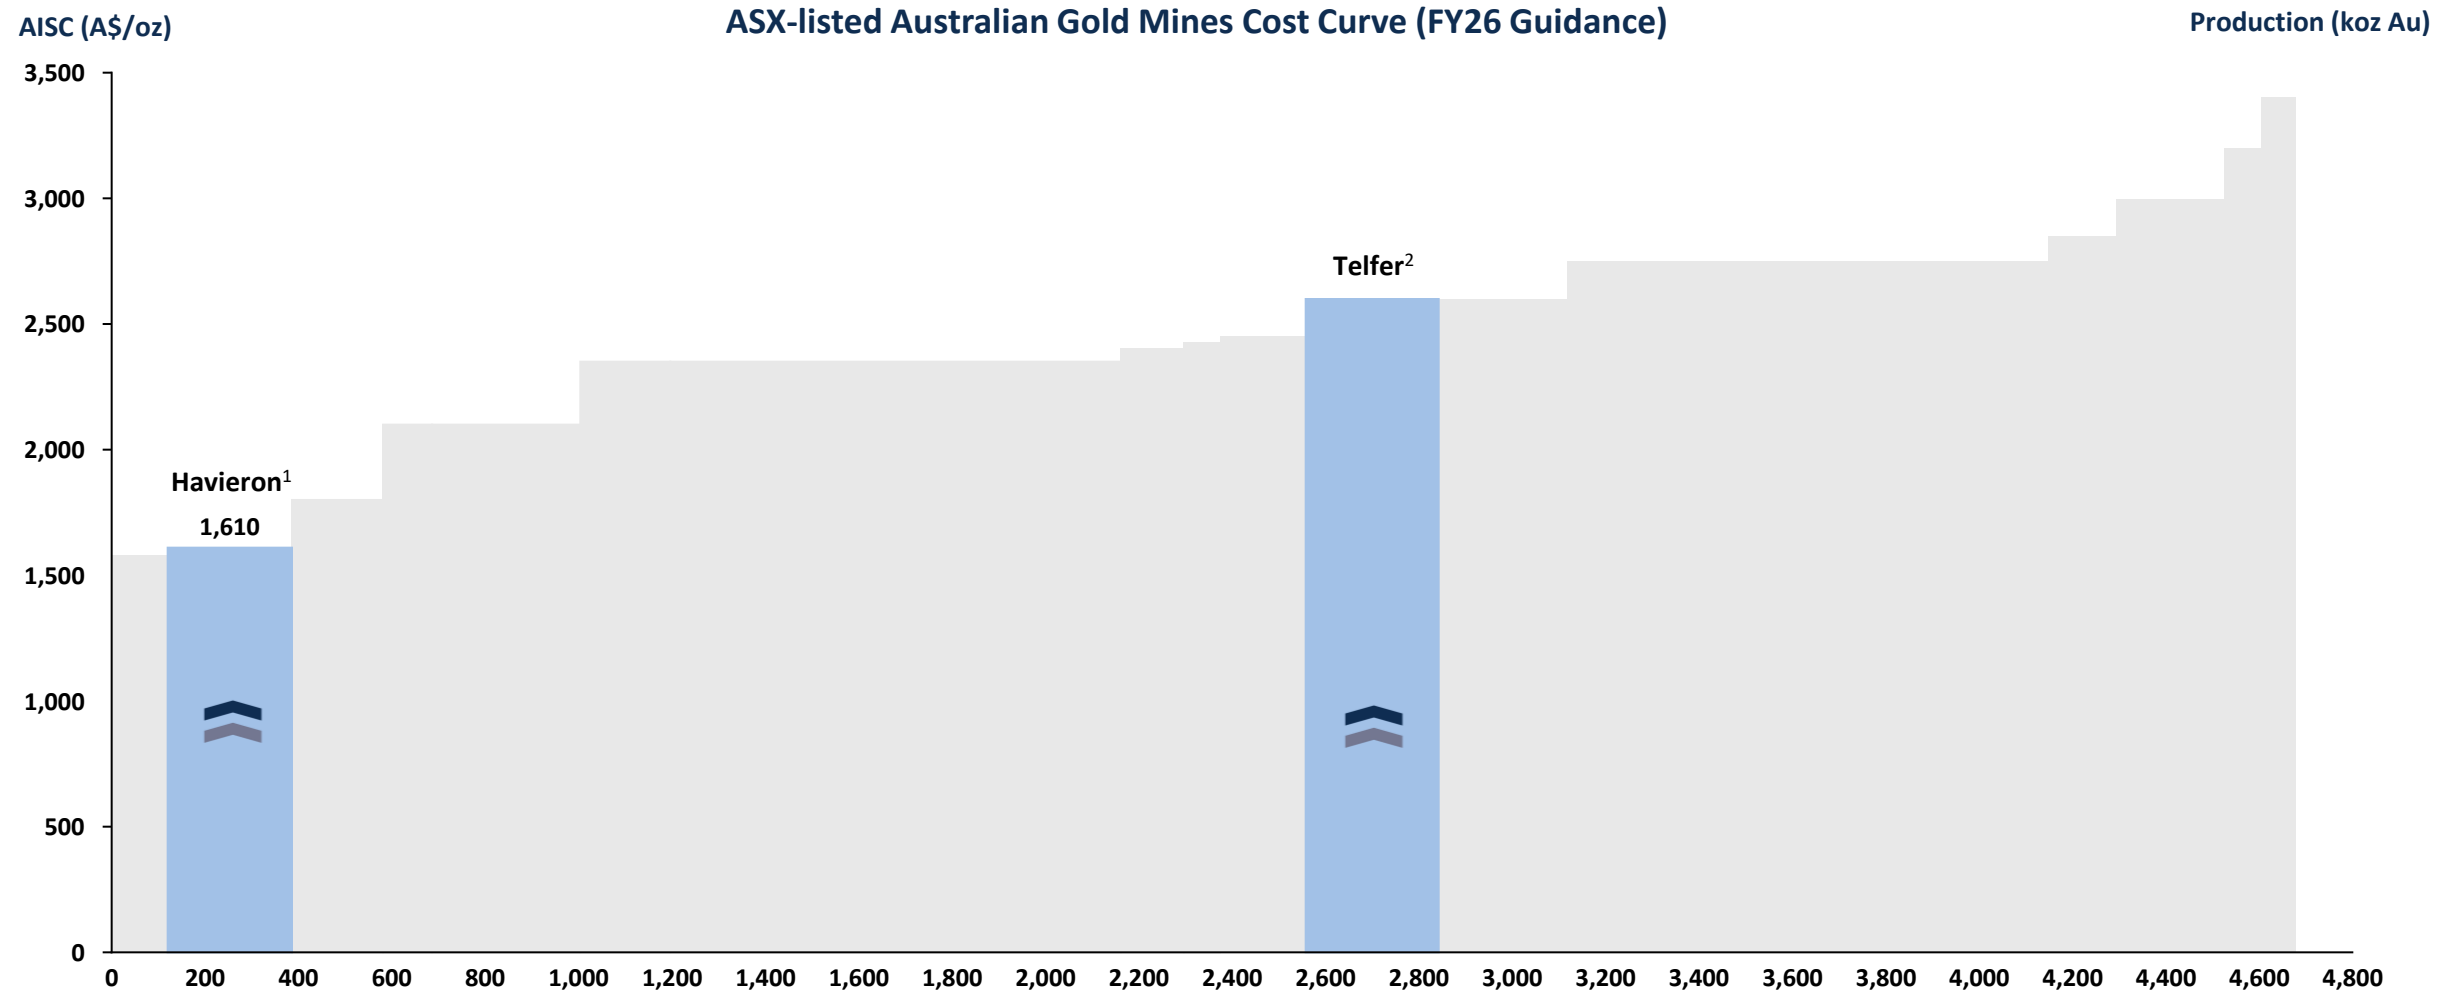

Combined 14.5% for contingency and growth allowance in Pre-Production CAPEX estimate

- Mining
- Non-Mining Infrastructure
- Utilities (Powerline, Pipeline, IT/OT)
- Owner's Cost
- Mining Infrastructure & Ventilation
- Haul Road
- Processing Plant & Tailings
- Contingency

A foundation asset to create a significant asset portfolio

Steady state Havieron would be the 6th largest current ASX primary listed Australian gold mine at 2nd lowest AISC (relative to FY26 guidance)

Note: Peer comparison mines are primary gold mines, located in Australia, owned by primary ASX listed companies, guiding to produce >50koz+ in FY26. Tropicana (70:30 joint venture between Regis Resources Limited (ASX:RRL) and AngloGold Ashanti Plc (NYSE:AU) shown on a 30% basis only. Refer to Appendix in slide 46 for comparison data sources.

(1) Havieron production of 266koz p.a. based on average of 9-year steady state period as outlined in the Havieron Feasibility Study. The Feasibility Study Mine Plan (and the forecast financial information derived from it) is a Production Target that includes approximately 13% Inferred Mineral Resource and 5% Exploration Target over the life of mine (on a contained gold basis). Refer to section on "Production Target" and the cautionary statement on slide 3. AISC is stated per ounce of gold produced, net of by-products (copper) credits, assuming a long-term copper price of A\$15,747/t Cu.

(2) Telfer production and AISC based on mid-point of FY26 guidance (285koz at \$2,600/oz AISC).

Life of mine physicals and AISC

Steady state average annual production of 266koz gold at lowest quartile AISC \$1,610/oz

Note: Data per the announcement 'Havieron Project Feasibility Study' released to ASX on 1 December 2025.

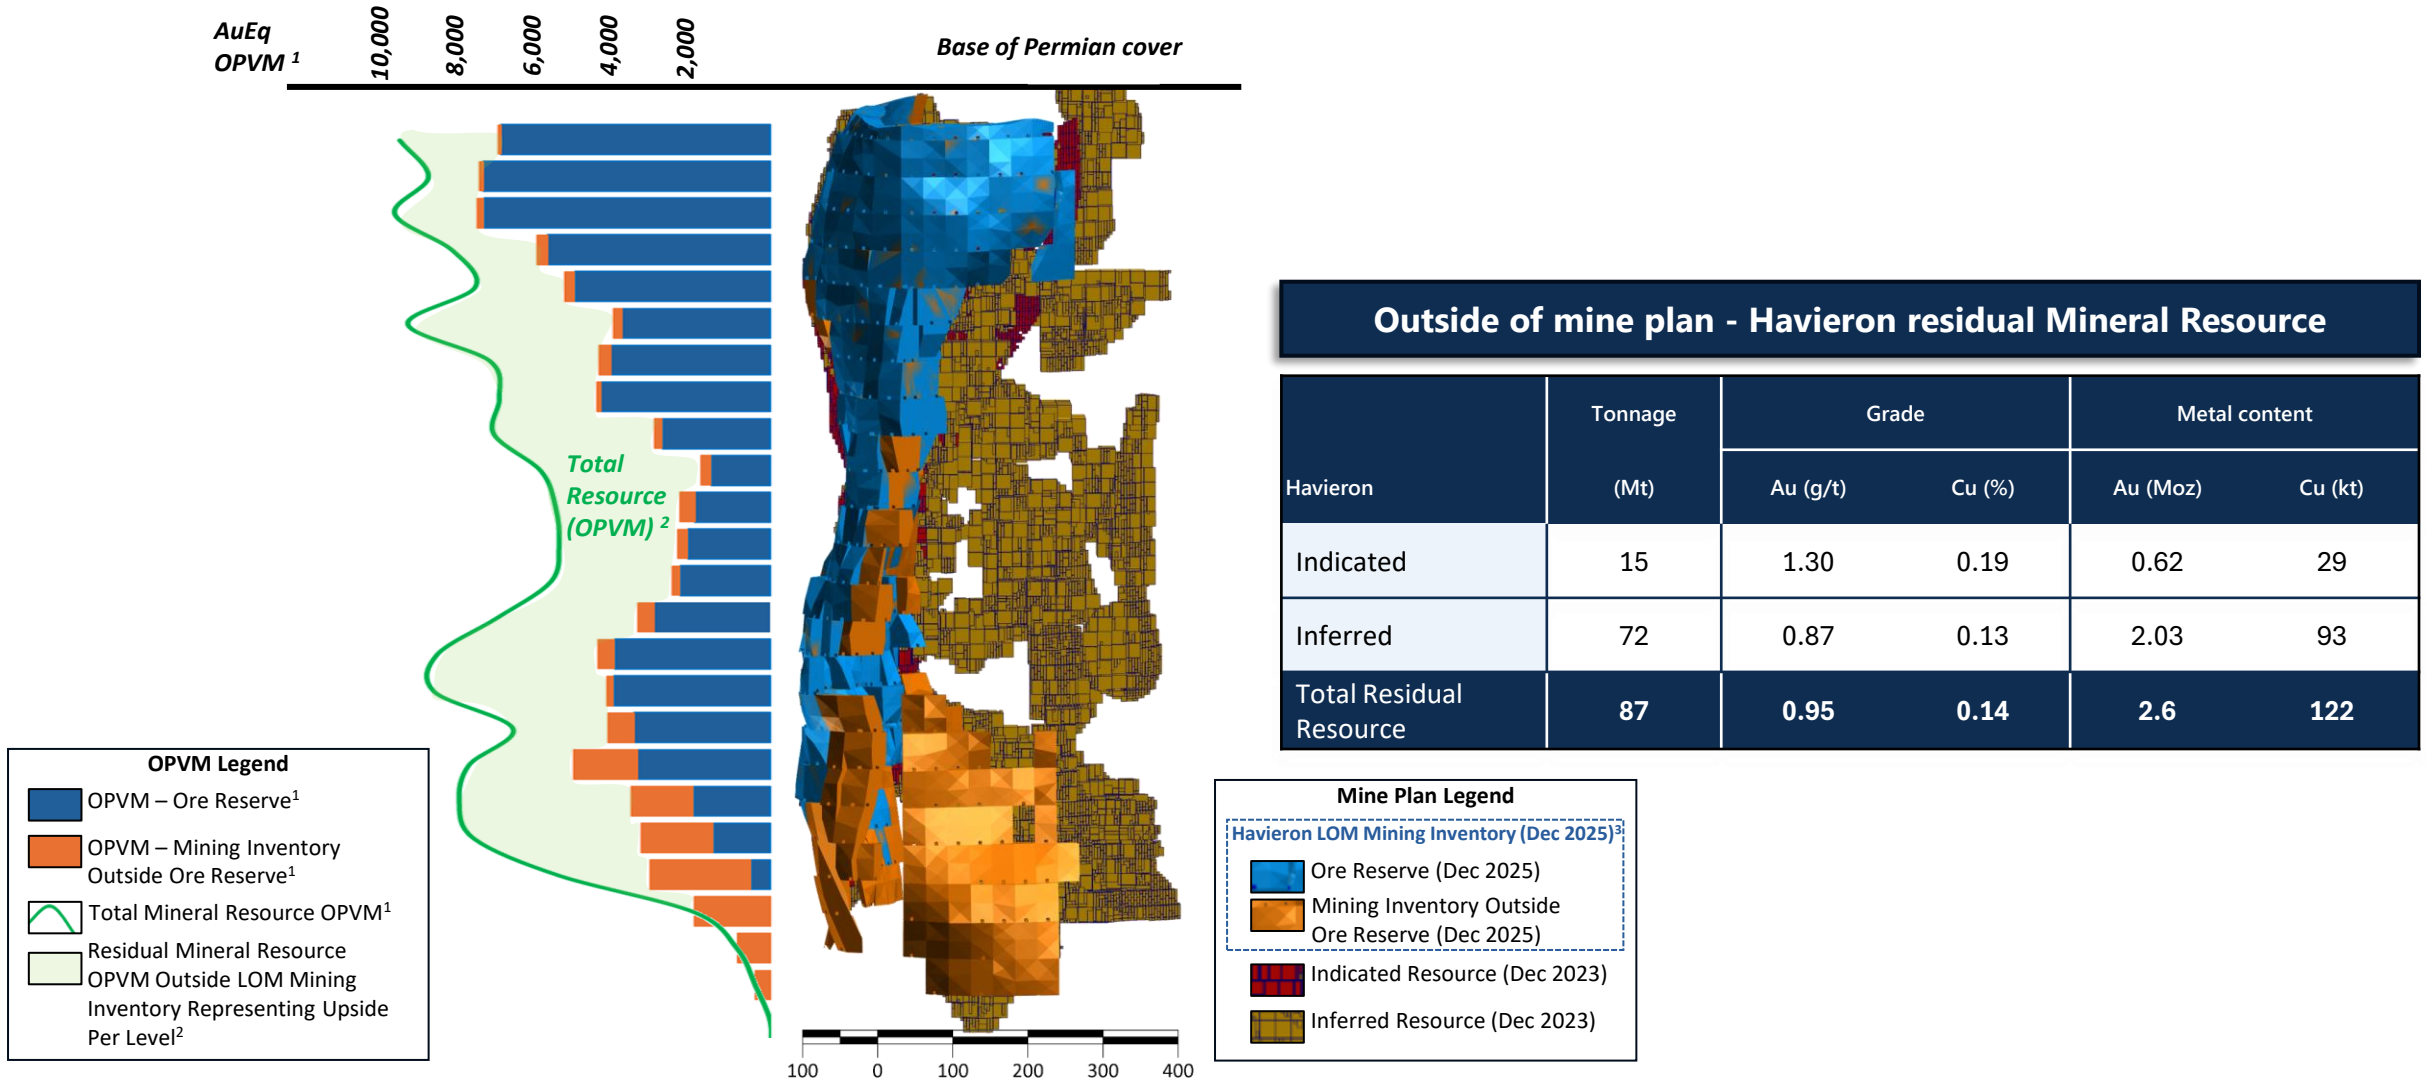

The Feasibility Study Mine Plan (and the forecast financial information derived from it) is a Production Target that includes approximately 13% Inferred Mineral Resource and 5% Exploration Target over the life of mine (on a contained gold basis). Refer to section on "Production Target" in the announcement "Havieron Project Feasibility Study" dated 1 December 2025, and the cautionary statement on slide 3.

(1) Steady State period refers to the 9-year period post pre-production and ramp-up, from Year 4 to 12 (inclusive), once the development of the conveyor decline is completed and the underground crusher and material handling system is installed and commissioned.

(2) Havieron Standalone base case is a conservative operating cost model that assumes no extension of the current Telfer mine life, thereafter processing only Havieron ore through Telfer mill, utilising ~70% of Train 1 nominal processing capacity of 10Mtpa (~35% of total Telfer processing capacity of 20Mtpa). AISC is stated per ounce of gold produced, net of by-products (copper) credits, assuming a long-term copper price of A\$15,747/t Cu.

Havieron residual Mineral Resource – Long-term optionality

Significant residual Mineral Resources remain outside the Feasibility Study LOM mining inventory

The Feasibility Study Mine Plan (and the forecast financial information derived from it) is a Production Target that includes approximately 13% Inferred Mineral Resource and 5% Exploration Target over the life of mine (on a contained gold basis). Refer to section on "Production Target" in the announcement "Havieron Project Feasibility Study" dated 1 December 2025, and the cautionary statement on slide 3.

(1) Ounces per vertical meter across levels within the Havieron ore body on an AuEq basis. Gold equivalent OPVM is based on assumed prices of A\$4,500/oz Au and A\$15,747/t Cu and metallurgical recoveries based on block metal grade, reporting approximately 86.6% for Au and 84.4% for Cu which equates to a formula of approximately AuEq = Au (g/t) + 1.06* Cu (%).

37 (2) Residual Resource for the Havieron Deposit represents the delta between Mineral Resource Estimates less the classified Resource within the current Ore Reserve and Mining inventory. This material is represented graphically across each level on an AuEq OPVM basis in the figure above. In aggregate the Residual Mineral Resource comprises 87Mt at 0.95g/t Au & 0.14% Cu, for 2.8Moz Au and 122kt Cu.

(3) Mining inventory represents the combination of Ore Reserve and Mining Inventory Outside Ore Reserve.

Indicative development schedule

Definitive schedule to be confirmed at FID, following receipt of primary environmental approvals

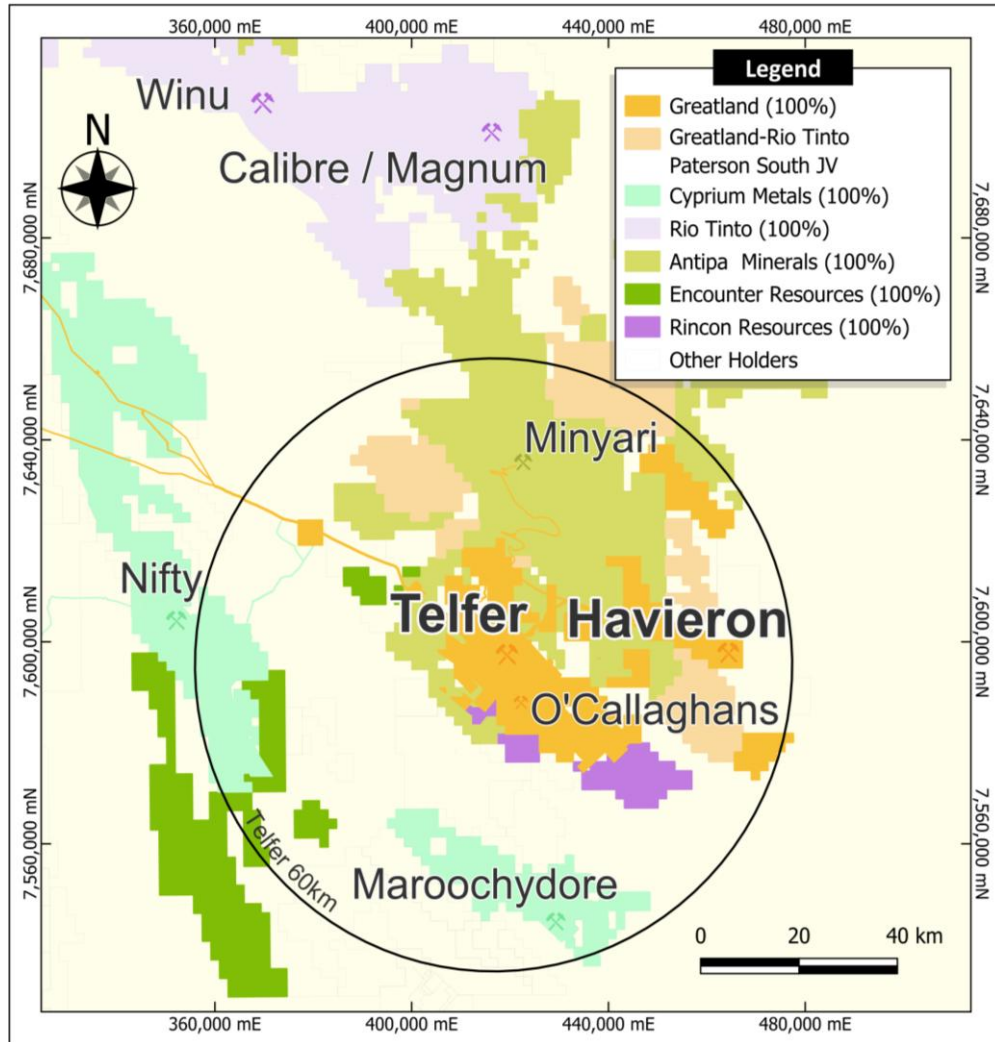

Timeline	PP0	PP1	PP2	Year 1	Year 2	Year 3	Year 4+
 Receipt of primary environmental approvals	█						
 Final Investment Decision (FID)	█						
 Bank Debt Facilities Finalised Post satisfaction of key conditions ¹	█						
 Pre-Production (Capex \$1,065m) includes completion of first decline, mine development, mine infrastructure, ventilation, haul road, processing plant upgrades, powerlines	█	█	█				
 First Development Ore			█				
★  First Gold				█			
 Mining Ramp-Up				█	█	█	
 Expansion Capex (\$673m) includes completion of second decline, underground crusher and conveyor system, further mine development				█	█	█	
★  Steady State Production 9-year Steady State, average 266koz p.a. ²							█

(1) Refer to slide 26 for details.

(2) The Mine Plan (and the forecast financial information derived from it) is a Production Target that includes ~13% Inferred Mineral Resource and ~5% Exploration Target over the life of mine (on a contained gold basis). Refer to section on "Production Target" and the cautionary statement on slide 3.

Greenfield exploration portfolio in the prospective Paterson region surrounding Telfer

Where ownership of the significant Telfer infrastructure enables a 'hub and spoke' strategy to potentially incorporate additional ore from regional sources

✓
>2,000 km²

Greatland has an exploration portfolio covering >2,000km² within 60km of Telfer in the highly prospective Paterson province, and an active exploration program

✓
Sole Operating Plant

Telfer is the only operating process plant in the Paterson – potential to unlock value from accretive regional opportunities

✓
2 x 10 Mtpa Capacity

Telfer has significant ore processing capacity with two 10Mtpa processing trains, enabling configuration flexibility

Note: Includes tenements subject to earn-ins / joint ventures.

Greatland reports its Mineral Resource and Ore Reserve estimates inline with the 2012 JORC Code.

- (1) Telfer Mineral Resources are reported as at 31 December 2025, grades are reported to two decimal places to reflect appropriate precision in the estimate, and this may cause apparent discrepancies in totals. Cutoffs for the Telfer MRE are applied based on a NSR using metal prices of A\$4,200/oz Au and A\$6.50/lb and current site cost and revenue assumptions. Cutoffs for the Havieron MRE was based on a NSR using metal prices of A\$2,360/oz Au and A\$5.20/lb Cu. Ore Reserve Estimates for Telfer as at 31 December 2024 and Mineral Resource Estimate for Havieron were set out in its replacement prospectus dated 30 May 2025 and announced to the ASX on 23 June 2025 (Prospectus).
- (2) As outlined in Greatland's Prospectus dated released 30 May 2025, the December 2023 Havieron Mineral Resource Estimate grades are reported to two decimal places to reflect appropriate precision in the estimate, and this may cause apparent discrepancies in totals. Cutoffs for the Havieron Deposit Mineral Resources were based on a NSR using metal prices of A\$2,360/oz Au and A\$5.20/lb Cu. Grades are reported to one (gold) and two (copper) decimal places to reflect appropriate precision in the estimate, and this may cause apparent discrepancies in totals. Results represent 100% of the Mineral Resource for Havieron. Mineral Resources in the Crescent and Link Zones are reported within a A\$80 Net Smelter Return/t ("NSR/t") shell while Mineral Resources in the Breccias are reported within a A\$50 NSR/t shell. Resources are inclusive of Reserves.
- (3) As outlined in Greatland's Prospectus dated 30 May 2025, grades are reported to two decimal places to reflect appropriate precision in the estimate, and this may cause apparent discrepancies in totals. Cut-offs for the Telfer December 2024 Ore Reserve Estimate is applied based on net smelter return (NSR) for each mining location, averaging A\$24.8/t processed for open pits and A\$13.7/t to A\$17.2/t processed for stockpiles, and metal prices of A\$3,450/oz Au and A\$4.16/lb Cu and exchange rate of 0.65 USD per AUD.
- (4) Ore Reserves Estimate for Havieron are reported as at 1 December 2025 and have been extracted from the Company's ASX announcement dated 1 December 2025 titled '[Havieron Project – Feasibility Study](#)'. Refer to the announcement for full details including JORC 2012 appendices. The Ore Reserves Estimate is based on the Havieron December 2023 Havieron Mineral Resource Estimate. Grades are reported to two decimal places to reflect appropriate precision in the estimate, and this may cause apparent discrepancies in totals. Cut-offs for the Havieron Ore Reserve are applied on a break-even cut-off NSR of A\$82/t processed, and metal prices of A\$2,500/oz and A\$10,141/t copper, average metallurgical recovery of 86.6% gold and 84.4% copper. Ore Reserves are reported within mining shapes based on a sub-level open stoping mining method with cemented paste fill. Reported metal was derived primarily from the Crescent Zone, and only the Indicated Mineral Resource component thereof. All Havieron Ore Reserves are reported as Probable Ore Reserves, no Proved Ore Reserves are reported.
